### VACCINE PASSPORTS— A DRACONIAN DISASTER

We are protesting this coup d'état by the technocratic elite of which you have become their political "worker bees". We must fight the villains who are stealing our liberties and freedom and oppressing us with digital passports! Placating politicians like yourself work for the corporations, and the ones getting rich from the lockdowns encourage this bioweapon called a vaccine. Digital vaccine passports deny our freedoms, dignity, and equality, and erodes our privacy and trust.

As our County Supervisors, and knowing no emergency trumps the Constitution, you took an oath to protect us by upholding both the U.S. and CA Constitution. You are on the front lines of the most important battle in history — the battle to save democracy, freedom, human liberty, and human dignity from this totalitarian cartel that is trying to rob us of the rights that every human being is born with.

We will continue fighting for human rights and medical freedom. Without these what are we? What is life reduced to? What's the point of preventing a few COVID-19 cases and deaths if the entire global population — including the billions who are at no risk from this so-called virus — must gamble their health in the process?

You must drop the plan of contracting with commerce for a vaccine digital passport. You must approve a resolution prohibiting stores and businesses to require a digital vaccine passport — including any other so-called paper pass that is both discriminatory and blatantly unconstitutional.
