Subject: Vax passport

To whom it may concern:

I came to the country from a foreign land as I thought we had the freedom act rights of independence. I can see now this country is destroying individual freedom to be.

This vax passport will destroy our nation and our children's future. The mere fact that the vax is not healthy for many with serious health issues. Many friends of ours have died from the vax already.

We deserve to have a right to our own body and taking that away from us we are returning in history to a Nazi existence.

Please reconsider this motion and give the people back their freedom.

Thank you

J.Degeners.
