Subject: Oppose vaccine passports

Hello,

I am writing to express my vehement opposition to vaccine passports. I believe them to be a violation of our privacy and freedom. The vaccine is not approved by the FDA, and mandating an experimental treatment is absurd. It furthers the despicable divisions growing in our culture between people of varying ideologies and political persuasions. In addition, the vaccine itself is dubious at best in efficacy.

Research strongly supports the best COVID outcomes in people who are metabolically healthy, who exercise and have sufficient vitamin D levels. If the County wanted to take a real stance on combating the coronavirus and a multitude of other health conditions that take far more lives than COVID has (heart disease and diabetes among them), they would throw considerable energy and funding to shift our population's actual health.

Thank you,

Jackie Greenhill
