Even though, this is not on the agenda, and you have stated that there is no passport mandate in this county, the idea of a digital vaccine passport has been hinted at throughout several counties because of fear of those vaccinated being endanger from those who are not vaccinated for Covid.

I am petitioning the board to pass a resolution that Ventura County state its opposition to and will refrain from issuing any form of vaccine passport system for businesses, schools and agencies, etc.

I have heard several board members express fear being in proximity of a non-vaccinated individuals. And worry about the safety of their staff interacting with those who may not be vaccinated. And businesses have the right to do something like this. If you have been vaccinated and it purportedly works, then you should be protected from anyone, vaccinated or not.

Businesses and schools using any kind of passport or any kind of verification system, implements coercion. It will create a 2 class immunity caste system, and would further the gap in equality, especially disproportionate numbers from our most vulnerable populations, such as low income, disabled, homeless, more than 40% of over age 65, including immigrants and communities of color, who are already subject to over policing and surveillance.

So I am asking you to be preemptive on any kind of passport system and pass a resolution to oppose any form of vaccine system in this county.

Kris Dukes
