Hi, tired of ppl saying we are racist. I have worked here out in the community for several yrs and never see racism. As soon as you start bringing all this racism speak, that is when ppl really begin to get divided. Look at Oregon!

VAERS data released today showed 157,277 reports of adverse events following COVID vaccines, including 3,837 deaths and 16,014 serious injuries between Dec. 14, 2020 and April 30, 2021. This is on the CDC's own website. And according to the CDC and Harvard, this is only 1% of actual cases.

Based on the facts, is very irresponsible to require ppl to get vaccines to be able to do anything like get on a plane, go to a country, go to an event, go in a store, etc..

*Thanks,
