Subject: vaccines

Dear Board Members,

I would like to go on record as a member of Ventura County for 65 years, that I believe vaccines should always be the choice of a well informed person above the age of 18. I disagree with any restrictions made for those who choose not to be vaccinated for their own personal reasons. The Covid vaccine is especially an odd one to require as it is not a threat to most people and those who contract it mostly can reasonably recover from it. Either way NO ONE should ever be required to put anything in their body without their informed consent, nor should it impede their ability to travel, secure a job or be in any public situation.

Thank You,
Terry Davenport (Sumner)
