

Linda Parks garbage resolution 21-005 had another fact fall away. New video demonstrates a peaceful crowd, a calm police line not overwhelmed, no violence entering the Capital building, in fact Capital Hill police invited in the peaceful protesters. The board has shamefully swallowed Linda Parks garbage resolution twice. Recall it.

The only extreme violence on Jan. 6 was Special Agent, David Bailey who murdered an unarmed female Air Force veteran from San Diego, Ashli Babbit. Where is Ashli's resolution? Do you not honor veterans nor women nor their American lives?

Sup. Ramirez recounted her personal experience with the jab, that she has signed up to give her account of adverse events. That's called journaling. It's an integral part of clinical trials where a drug has not been approved. Ergo, Ramirez is in a clinical trial as are all who take the jab.

Sup. Long mentioned sterility as an adverse event. That would be answered definitively should the jab be an approved drug. Again, providing more eye-opening insight that this is a clinical trial of an unapproved drug with unknown outcomes.

Lastly, the outrageous medical bullery of Dr. Levin who shames those who ask integral health questions on behalf of the public - going so far as to call them "hurtful" and causing him emotion - is disgusting and he should have his license pulled immediately. How dare this dubious doctor forecast that which the actual manufacturer cannot answer!

What a disgrace!
