I am writing to express my strong opposition to a vaccine passport for Ventura County. A vaccine passport would be a violation of privacy, making private health information and other private info public. What happened to the "right to privacy"? A vaccine passport would also be a means of making those who choose not to receive the still-experimental vaccine into second-class citizens. This is not what Ventura County stands for. I call on the Ventura Board of Supervisors to reject any form of vaccine passport in our county.
