Please note my opposition to the *pending approval and funding of Agenda item 33, which authorizes and approves funding for coercing people into getting liability free products that are still not FDA approved and are causing deaths and injuries. Pushing these products on people with no accountability for the harm they do is criminal and every agency encouraging it is doing harm to public health and safety by doing so. It is repugnant to the Constitution to create laws and mandates that harm people and the State and County are overstepping their authority by using federal and state tax dollars to carry out such activities. Quit writing federal checks your County butts should not cash. Quit demanding people accept harmful products and illegal patient info disclosures as conditions to live and breathe. Uphold your Oath or get recalled or jailed. No more masks. No more following bullshit mandates from Gavin, either. He's not my daddy and I don't take orders from him. We are done complying. We want audits of every red cent collected and distributed related to this Scamdemic from every agency, and every community partner too. You down with PPP cause ya thought it was free? Blood money is what that was, and everyone accepting it is OK with going along with the fraud. Everyone hurt by these state sanctioned activities should be held accountable when they cause harm but they are not. So, I will note my opposition to the approval NOW and ask the County to consider how it looks when they are pushing people to accept peer pressure to take drugs. Those vaccines killed every single ferret that was part of the studies.....and the stories of horrific side effects are mounting daily despite efforts to suppress information, on social media and in mainstream media. It is my duty to my fellow human beings to stand up and speak in defense of those too weak or scared or oppressed to, when I see harm being done. I will not ever apologize for that part of who I am or back down from that position.

If I make memes about drugs can I get lucrative County contracts or do those only go to close homies and county cronies? I have valuable insights but get waived off, and my concerns discredited but I have the receipts to prove what I am saying about what I saw happen at UCLA during their vaccination event. Scary stuff.

FDA approval does not make something safe, either. Do the right thing and don't keep pushing poison on residents of our county. If you do, you have blood on your hands.

- PHARMACEUTICAL TECHNOLOGY**
- Pfizer and Moderna vaccines use mRNA technology, which has never been used before in humans.
 - Concerns about this new technology include genetic interference, infertility, and autoimmune reactions.
 - The COVID-19 vaccine is the first vaccine Moderna has brought to market.

2. COVID-19 VACCINE MAY OFFER ONLY SHORT-TERM PROTECTION

- Previously developed coronavirus vaccines have failed at creating long-term protection.
- Dr. Anthony Fauci has stated publicly that the COVID-19 vaccine isn't going to create a long duration of immunity and will likely only last a few months.

3. COVID-19 VACCINE MANUFACTURERS ARE EXEMPT FROM LIABILITY

- According to the CDC, all vaccines have the potential to cause injury or death. If an individual is injured or killed by a COVID-19 vaccine, the manufacturer cannot be held liable per the emergency PREP Act.
- Without any liability, what incentive is there to ensure the vaccine is as safe as possible?

4. THERE IS NO LONG-TERM SAFETY DATA ON COVID-19 VACCINES

- The COVID-19 vaccine is the most rushed vaccine in history. Clinical trials have only lasted a matter of months, which means the full scope of adverse reactions has not thoroughly been measured.
- As a result, medical professionals around the world have expressed concern about whether or not this vaccine is even safe for the general population.
- Additionally, several manufacturers skipped animal testing and went straight to human trials, bypassing an important part of the safety process.

5. SEVERAL COVID-19 VACCINE MANUFACTURERS HAVE BEEN CONVICTED OF FRAUD

- Pharmaceutical companies Pfizer and AstraZeneca have been convicted and fined hundreds of millions of dollars for medical fraud, negligence and making false claims about their products.
- This is the first vaccine Moderna has produced, yet they are currently under investigation for fraud, negligence and unlawful business practices related to their COVID-19 vaccine.
