Hello,

I apologize I didn't take the time to understand your system well enough to sign up to speak yesterday.

It is my hope the Board will vote Yes on Crestview's request to drill a new well.

I have relied on the Crestview Water District for my household water since 1986. I have found the Crestview Board to be responsive and transparent and responsible. It is my understanding that if this well is not buildt, then Crestview will have to buy outside water and this will significantly reduce the ability to make local decisions about water use.

I know my home is not neighbor to the new well, but I am sure I would still want a Yes vote. Once the well is in place, it is not noisy or noxious in any way and the pump can certainly be obscured by attractive foliage--I say this as I understand that it is the location of the well itself that is the prime reason for the objections against the well.

If it were possible to read this comment today, I would be grateful.

Josephine Soliz MD
