Thank you so much for your attention!

I live in Midtown Ventura. My neighbor Tim across the street died shortly after receiving his Covid shot. My 70 year old neighbor Nancy nearly lost her life after receiving the J&J shot, was admitted to ICU twice, and was hospitalized for almost 2 months. The cost of her medical care was about \$43,000, Fortunately she only obligated to pay about \$1000 co-pay. Interestingly, while in the hospital, she ascertained that about 60% of the staff are declining the vaccines. What do they know and see that we don't? She had no prior illness or symptoms, is a healthy weight, likes to garden, doesn't smoke, drink or have underlying conditions - a healthy woman. She said "I brought this on myself. I would never do it again and if they ask me to do a booster shot Ill say 'Hell no' People should have a choice".

Many people are dying or being severely injured by the covid vaccines, seemingly much more than are benefiting from them.,,we know one size doesn't fit all.

This [Facebook post](#) is just a small example. I will send a PDF in a separate email documenting a alarming number of vaccine injuries and deaths.

We know according to the CDC that the survival rate for unvaccinated people for the Covid illness is 99.x% depending on age group (and of course health factors). We also know that there are several therapies and therapeutic medications, supplements, treatments and remedies that can treat the Covid illness without a vaccine, including simply staying home and resting like a people normally do having a cold or flu and allowing their own immune systems fulfill their function.

It is well know that the vaccines do not prevent transmission of the virus. The vaccinated populations have higher rates of transmission

Never once does the CDC or any other governmental organization ever advise people to take responsibility for thier own health by losing weight, eating better, exercising, getting outside, mediating, quitting smoking, and any number of well know and accepted health practices; but only supports one single solution; vaccines and nothing else. health has become redefined by taking in externally manufactured drugs, hand sanitizers and isolation.

In light of all of dangers, the injured reported to VAERS, why is the County pushing so hard to vaccinate the entire population, spending massive amounts of resources, and allowing theaters and other establishments to discriminate against people who choose not to take the risks of the shots ? Yes we have had the given main stream media reasons told tow us over and over for the past year and half, yet these are no longer credible in the face of friends and neighbors dying and getting injured.

Thank you for your leadership and attention.

-Monika Petroczy

Did you know at least 20 volunteers in the trials died?

Volunteer in AstraZeneca COVID-19 vaccine trial dies in Brazil: officials

By Nishi Manchikar and Jacqui Safir

October 21, 2020 | 147pm

A Brazilian volunteer in the AstraZeneca COVID-19 vaccine trial has died, health officials announced Wednesday.

The patient was identified as Joao Pedro Feitosa, a 28-year-old doctor in Rio de Janeiro who had been on the frontlines of the COVID-19 pandemic.

Six people died in Pfizer's late-stage trial of the COVID-19 vaccine, the US Food and Drug Administration has revealed just hours after Britain became the first country in the world to roll out the vaccine.

Priest who participated in trial for Moderna vaccine dies suddenly |

02 Dec 2020 | A Ukrainian Greek-Catholic priest, who was previously a volunteer in the testing of Moderna's COVID-19 vaccine, has died suddenly in his home. It is still unclear if the 70-year-old's death is related to the vaccine. Fr. John Fields was the Communications and Religious Education

Yarah Dalmou

"Dec 18th 2020 - My Dad participated in the Johnson & Johnson Trial COVID vaccine shot. They promised all medical expenses paid for any complications related to COVID for the next 2 years. My Dad found security in the medical expense coverage and possibility to have access to a vaccine- that he decided to do the trial.

Dec 25th 2020 - One week later- Christmas Day - Dad was very fatigued. He felt tired right after the shot and when I spoke with him on Christmas day, I recall he sounded exhausted. Which is unlike him, especially on Christmas.

Jan 4th 2021 By the first of the year, he was very sluggish and found it hard to do his exercises that he does weekly. He always likes to stay

Jan 25th - Dad contacted Johnson & Johnson and they did a COVID test. Results came back 3 days later as negative. They advised he has flu like symptoms and to rest and drink lots of fluids.

Jan 29th my Dad could barely walk. His legs became so weak that he shook when he walked. He thought maybe he was battling a flu and tried to keep resting through the weekend in hopes he would feel better.

Feb 1st - my mom brought him to Lake Mary Emergency room and they immediately transported him via ambulance to Advent Altamonte because of very high troponin levels.

Feb 1st - 4th -My Dad was at Advent Health Altamonte where they ran all kinds of tests and discharged him on the night of Feb 4th . Referring him to an oncologist, infectious disease Dr, cardiologist and PCP.

Feb 5th- Friday I saw my Dad at 11 AM and he could not walk and was very lethargic and sleepy. I called and made all his referral appointments and scheduled him to see his PCP first thing Monday.

Feb 6th- Saturday. I woke up at 6 AM and drove to my parents house and my Dad was completely out of it. He could not get out of bed, pick up his coffee to drink, lift his head. He did not know what year, day, month we were in. We took him to Advent Orlando and within 20 minutes they got him in and found a blood infection and swelling in brain.

Feb 20th We have been here 2 weeks today, and today my Dad started on dialysis.

I am not an anti-vaxxer by any means. But I think there should be some public awareness of the dangers of being part of a trial vaccine. Especially one that is being done in warp speed. And the chance I would recommend someone to get the Johnson & Johnson vaccine, is slim to none. They have denied any type of connection."

55 People Died in US After Receiving COVID-19 Vaccines: Reporting System

BY ZACHARY STIEBER | January 16, 2021 | Updated: January 16, 2021

Fifty-five people in the United States have died after receiving a COVID-19 vaccine, according to reports submitted to a federal system.

Deaths have occurred among people receiving both the Moderna and the Pfizer-BioNTech vaccines, according to the reports.

One man, a 66-year-old senior home resident in Colorado, was sleepy and stayed in bed a day after getting Moderna's vaccine. Early the next morning, on Christmas Day, the resident "was observed in bed lying still, pale, eyes half open and foam coming from mouth and unresponsive," the VAERS report states. "He was not breathing and with no pulse."

In another case, a 93-year-old South Dakota man was injected with the Pfizer-BioNTech vaccine on Jan. 4 around 11 a.m. About two hours later, he said he was tired and couldn't continue with the physical therapy he was doing any longer. He was taken back to his room, where he said his legs felt heavy. Soon after, he stopped breathing.

Since this article was published in January, VAERS has recorded **86,080** COVID vaccine adverse reactions including:

3,186 deaths

1,217 permanent disabilities

15,000+ ER / hospitalizations

Death of Florida doctor after receiving COVID-19 vaccine under investigation

Karen Weintraub USA TODAY

Published 9:00 p.m. ET Jan. 6, 2021 | Updated 9:26 a.m. ET Jan. 7, 2021

A Florida doctor has died several weeks after receiving a COVID-19 vaccine, although it's not yet clear whether his death Monday was related to the shot he received on Dec. 18.

Dr. Gregory Michael, 56, an OB-GYN at Mount Sinai Medical Center in Miami Beach, died after suffering a hemorrhagic stroke apparently resulting from a lack of platelets.

In a [Facebook post](#), Michael's wife, Heidi Neckelmann, said he sought emergency care three days after the shot because he had dots on his skin that indicated internal bleeding.

Heidi Neckelmann

January 5 at 11:00 PM · 🌐

The love of my life, my husband Gregory Michael MD an Obstetrician that had his office in Mount Sinai Medical Center in Miami Beach Died the day before yesterday due to a strong reaction to the COVID vaccine.

He was a very healthy 56 year old, loved by everyone in the community delivered hundreds of healthy babies and worked tirelessly through the pandemic. ↴

He was vaccinated with the Pfizer vaccine at MSMC on December 18, 3 days later he saw a strong set of petechiae on his feet and hands which made him seek attention at the emergency room at MSMC. The CBC that was done at his arrival showed his platelet count to be 0 (A normal platelet count ranges from 150,000 to 450,000 platelets per microliter of blood.) he was admitted in the ICU with a diagnosis of acute ITP caused by a reaction to the COVID vaccine. A team of expert doctors tried for 2 weeks to raise his platelet count to no avail. Experts from all over the country were involved in his care. No matter what they did, the platelets count refused to go up. He was conscious and energetic through the whole process but 2 days before a last resort surgery, he got a hemorrhagic stroke caused by the lack of platelets that took his life in a matter of minutes.

He was a pro vaccine advocate that is why he got it himself.

I believe that people should be aware that side effects can happen, that it is not good for everyone and in this case destroyed a beautiful life, a perfect family, and has affected so many people in the community Do not let his death be in vain please save more lives by making this information news.

Johns Hopkins Scientist: 'A Medical Certainty' Pfizer Vaccine Caused Death of Florida Doctor

Dr. Jerry L. Spivak, an expert on blood disorders at Johns Hopkins University, told the *New York Times* Tuesday that he believes "it is a medical certainty" that Pfizer's COVID vaccine caused the death of Dr. Gregory Michael.

Autoimmune means that something in the vaccine may be provoking the body to create antibodies to its own platelets, could be because of molecular mimicry, or cross reactivity between proteins.

ITP has been documented to occur after the MMR vaccine, as well as influenza vaccines, DTP vaccine and hepatitis A vaccines. ↴

Why was no one warned that immune thrombocytopenia is a reaction to the COVID vaccine?

The New York Times

Covid Vaccine Recipients Developed a Rare Blood Disorder

By Denise Grady

Feb. 8, 2021 Updated 5:07 p.m. ET

One day after receiving her first dose of Moderna's Covid vaccine, Luz Legaspi, 72, woke up with bruises on her arms and legs, and blisters that bled inside her mouth.

She was hospitalized in New York City that day, Jan. 19, with a severe case of immune thrombocytopenia — a lack of platelets, a blood component essential for clotting.

The same condition led to the death in January of Dr. Gregory Michael, 56, an obstetrician in Miami Beach whose symptoms appeared three days after he received the Pfizer-BioNTech vaccine. Treatments failed to restore his platelets, and after two weeks in the hospital he died from a brain hemorrhage.

"I think it is possible that there is an association," Dr. James Bussell, a hematologist and professor emeritus at Weill Cornell Medicine who has written more than 300 scientific articles on the platelet disorder, said in an interview. "I'm assuming there's something that made the people who developed thrombocytopenia susceptible, given what a tiny percentage of recipients they are."

He added: "Having it happen after a vaccine is well-known and has been seen with many other vaccines. Why it happens, we don't know."

Ms. Legaspi was strong and in good health before receiving the Moderna vaccine. But when she was admitted to the city hospital in Elmhurst, Queens, her platelet count was zero. Normal readings range from 150,000 to 450,000, and anything under 10,000 is considered very dangerous and in urgent need of treatment.

Doctors ordered Ms. Legaspi to not even get out of bed without help, for fear that if she fell and injured herself she could hemorrhage. They began giving her the standard treatments, including platelet transfusions along with steroids and immune globulins meant to stop her immune system's war on her platelets.

Nothing worked. Her platelets would rise a bit and then crash again between treatments.

As the days passed with no progress, Ms. Legaspi's daughter, aware of Dr. Michael's death, worried increasingly that her mother would suffer a brain hemorrhage.

"I don't think she understands she's like a ticking bomb," the daughter said in an interview on Jan. 28, after her mother had been in the hospital for more than week with no improvement. "I don't use the term. I don't want to tell her that."

Dr. Gregory Michael

Ms. Legaspi

Another vaccine recipient, Sarah C., 48, a teacher in Arlington, Tex., received the Moderna vaccine on Jan. 3. She asked that her full name not be used to protect her privacy.

Two weeks later, she began to have heavy vaginal bleeding. After two days she saw her obstetrician, who ordered blood work and scheduled other tests. A few hours later, he called and urged her to go straight to the emergency room. He was stunned and hoped it was a lab error, but her blood count showed zero platelets. She had had a checkup with completely normal blood-test results less than a week before being vaccinated.

The reading of zero platelets was not a lab error. The results were confirmed in the emergency room, and doctors there also noticed red spots on her wrists and ankles, caused by hemorrhages under the skin. Sarah C. had seen the spots, but ignored them.

She spent four days in the hospital, receiving platelet transfusions, immune globulins and steroids to restore her platelet count.

She described the experience as terrifying. "Especially when people say they'd never seen this before, that you could bleed out or hemorrhage," she said. "That was the biggest concern, and just not knowing. The gentleman in Florida, he didn't make it. Certainly the fear was there."

If she had known enough to recognize the red spots and bleeding as danger signs, she said, she would have gone to the emergency room much sooner.

Health care worker dies after second dose of COVID vaccine, investigations underway

Tim Zook's last post on Facebook brimmed with optimism. "Never been so excited to get a shot before," he wrote on Jan. 5, above a photo of the Band-Aid on his arm and his COVID-19 vaccination card. "I am now fully vaccinated after receiving my 2nd Pfizer dose."

Zook, 60, was an X-ray technologist at South Coast Global Medical Center in Santa Ana. A couple of hours later, he had an upset stomach and trouble breathing. By 3:30 p.m. it was so bad his colleagues at work walked him to the emergency room. "Should I be worried?" his wife, Rochelle, texted when she got the news. "No, absolutely not," he texted back. "Do you think this is a direct result of the vaccine?" she typed. "No, no," he said. "I'm not sure what. But don't worry."

There were suspicions of COVID and a diagnosis of congestive heart failure. Zook was put on oxygen, then — just four hours later — a BiPAP machine to help push air into the lungs. Multiple tests came back negative for COVID.

Shortly after midnight on Jan. 7, the hospital called. Zook was in a medically induced coma and on a ventilator to help him breathe. But his blood pressure soon dropped and he was transferred to UC Irvine Medical Center. "On Friday I get a call, 'His kidneys are failing. He needs to be on dialysis. If not, he could die — but there's also a chance he might have a heart attack or stroke on dialysis because his blood pressure is so low,'" Rochelle Zook said.

By 4 a.m. Saturday, Jan. 9, Zook had gone "code blue" twice and was snatched back from the brink of death. There was a third code blue in the afternoon. "They said if he went code blue a fourth time, he'd have brain damage and be a vegetable if he survives," Rochelle Zook said.

Later that day, Tim Zook died.

Healthy 39-year-old goes into full liver failure within hours of shot

Utah woman, 39, dies 4 days after 2nd dose of COVID-19 vaccine; autopsy ordered

by HEIDI HATCH | KUTV Staff
Wednesday, March 10th 2021

SALT LAKE CITY (KUTV) — During a [KUTV investigation into COVID-19 vaccine side effects](#) and where to report them, we found four reported deaths, filed by Utah families and their caregivers to the CDC's Vaccine Adverse Effects Reporting System.

One case stood out, a [39-year-old single mom from Ogden](#) who died four days after her second dose of the Moderna COVID-19 vaccine. Her family, who is now waiting on an autopsy, held a celebration of life for her this past weekend.

Kassidi Kurill, by all accounts, was healthy, happy and "had more energy" than just about anyone else around her. Her family told 2News she had no known health problems or pre-existing conditions.

Four days after Kurill's second dose of the COVID-19 vaccine, she was gone — dead before most of her family could say their goodbyes.

"She came in early and said her heart was racing and she felt like she need to get to the emergency room," Hawley said.

"They did a blood test and immediately came back and said she was very, very sick, and her liver was not functioning," Hawley said.

Kurill was flown to Intermountain Medical Center in Murray, a trauma center where they had the ability to do transplants if needed. Her liver was failing and a transplant, doctors believed, was her best option at survival.

She died, he said, 30 hours after they arrived in the emergency room.

Will employers accept liability for their front-line workers' deaths/injuries if they require the shot in order to work?

39-year-old nurse aide dies 'within 48 hours' of receiving mandated COVID-19 shot

HURON, Ohio, January 27, 2021 (LifeSiteNews) — A 39-year-old woman with no known comorbidities died unexpectedly in northern Ohio within 48 hours of receiving a COVID-19 vaccine, which was reportedly required by her employer.

Janet L. Moore, a nurse aide at Admirals Pointe Nursing Home (APNH) in Huron, was found unresponsive in her car outside her apartment complex on December 31 around 8:00 p.m., her brother Jacob Gregory told LifeSiteNews.

"She was coming home from work and as soon as she drove into her parking lot she passed away," he said. "According to her neighbors she wasn't feeling good directly after the vaccine, and then ever since the vaccine she was actually feeling nauseated, she'd have like migraines and stuff like that. And then, within 48 hours, she ended up passing away."

Gregory mentioned that his deceased sister, a mother of two sons, was required to receive this vaccine due to her nursing home employment.

A nursing home in Janesville, Wisconsin, which mandated their employees receive these experimental biological agents did in fact lay off workers who declined the injections.

Nearly a dozen employees were forced from their jobs due to the policy, and 27 wrote letters of complaint seeking to have the policy changed.

Their concerns included how this biological agent, which was rushed through development and testing, may have dangerous, unknown long-term effects, while others expressed worries about it affecting their pregnancy or fertility.

More generally they objected to being told they had to take a vaccine which was not approved by the Food and Drug Administration (FDA). While these vaccines have been given emergency use authorization by the FDA, neither has the full approval of the agency.

The U.K. government issued a 10-page report late last year that warned coronavirus vaccines should not be used by pregnant or breastfeeding mothers. With regard to their impact on fertility, the document simply states it is "unknown whether COVID-19 mRNA Vaccine BNT162b2 has an impact on fertility."

Safety concerns with these vaccines also include "allergic" and "potentially fatal reactions," that they may actually cause an increased vulnerability to the virus, and that, indeed, worries over long-term effects remain legitimate as these vaccines lack proper testing.

In addition, the FDA also drew up a document this fall listing the possible side-effects from a COVID-19 vaccine, including strokes, encephalitis, auto-immune disease, birth defects, Kawasaki disease, and death.

Auburn Woman Warns She Saw Grandfather's Aid Die After COVID Vaccine

By Marissa Perlman January 25, 2021 at 12:45 pm

AUBURN (CBS13) – The Placer County Sheriff's Office announced Saturday that a person tested positive for the virus in late December and died hours after getting the vaccine on Thursday.

Now, there are questions from the community on the safety of the vaccine. An Auburn woman says she witnessed the tragedy first hand.

In a post on Facebook, she said she saw her grandfather's aid, a 56-year-old man, get the vaccine at a senior living facility on Thursday.

"Twenty minutes later he realized his legs felt tingly and he was having shortness of breath. He was wheeled out in an ambulance...1 hour later he was in ICU on a ventilator and three hours later he passed away," she wrote.

If you're a reporter inquiring about the recent death of University of Cincinnati student (and Columbus area resident) John Francis Foley, this is the only on the record statement from his family. Please do not contact the family or funeral home.

STATEMENT FROM MICHAEL AND MARY BETH FOLEY

Our beloved son **John Francis Foley** is gone, and our family mourns the loss of this wonderful and sweet joy of our lives. While the facts remain unclear how he died, we are rejoicing in how he lived: caring for others, lit with God's grace, and generous to all. We know the doctors involved are doing their best. We must be patient, and we ask everyone else to be patient, too. John was going to be a doctor, so this is what he would want.

We understand many want to know more about his death -- we do, too -- but we ask people to understand that this is the time for our family to grieve in private. Thank you.

###

The family is not taking media inquiries.

John Francis Foley

The Angels came down from heaven on April 11, 2021 to collect for repose the soul of John Francis Foley, age 21. John was one of them, and the Lord could no longer bear Heaven without him. John is the beloved son of Michael and Mary Beth Foley and the adored baby brother of Emma and Patrick Foley. He was a graduate of St. Charles Preparatory School. Among John's many accomplishments, he was a National Latin Scholar, Altar Server of the Year, Eagle Scout and National Honor Society Member. John was a junior studying Medical Sciences at the University of Cincinnati, and was on the Dean's list every semester. In addition to being an excellent student, he was very active in the community and volunteered with the Saint Vincent De Paul Society, Breakthrough Cincinnati and the Parker Woods Montessori Public School. At UC, John was blessed to have met a group of amazing roommates and friends who John loved very much. They will gather on Wednesday, April 14 for a Vigil at 8pm for John in Burnet Woods Park at the University of Cincinnati. John's family cannot thank them enough for being John's family at UC. John was a generous, caring and loving friend. He was lit with grace from within that shown in his ready smile. John loved the Bearcats, but cheered for Notre Dame

Vivek was in the news on Thursday for his efforts to remove the fear of vaccination among the public. Instead of going to a private hospital, he chose to get vaccinated at a government hospital to spread awareness.

He told media persons after taking the first jab of the COVID-19 vaccine, "The government hospitals provide healthcare services to the majority of poor people. Many have doubts about vaccination and its side effects. There are also several rumours doing the rounds. I want to put an end to all the rumours. I want to show people that there is no danger in getting vaccinated."

He added, "On the contrary, it will protect us. And it is not like this vaccination will completely prevent us from getting Covid-19 infection. After the vaccination, even if we catch the virus, there won't be death. So after vaccination, we should still follow the safety guidelines."

Gloucester resident dies within hours of receiving Pfizer vaccine

58-year-old Gloucester resident Drene Keyes was a gifted singer, a mother and grandmother of six.

Unexpectedly, Lisa lost her mother on Saturday within a couple of hours after Keyes received the Pfizer vaccine in Warsaw.

Keyes had diabetes, sleep apnea and was obese. Her job made her eligible for the first dose. So, on Saturday, Keyes got the Pfizer vaccine and spent 15 minutes in the mandatory observation period.

The coworker she was with said she was trying to get in the car and said, "Something is not right. Something's not right."

Doctors later on told Jones her mother couldn't breathe and started vomiting. They did administer an EpiPen, CPR and oxygen as well.

She was quickly rushed to Riverside Tappahannock Hospital.

"They tried to remove fluid from her lungs. They called it 'flash pulmonary edema.' and doctors told me that it can be caused by anaphylaxis," said Jones. "The doctor told me that often during anaphylaxis, chemicals are released inside of a person's body and can cause this to happen."

"Why are we allowing people with underlying conditions to be guinea pigs for a vaccine that is still in clinical trials and emergency use?" Jones questioned.

NY man dies shortly after vaccination

NEW YORK - A man died shortly after receiving a COVID-19 vaccination at the Javits Center in Manhattan but it was not believed to be due to an allergic reaction, state officials say.

The man, in his 70s, collapsed as he was leaving the vaccination site on Sunday morning.

"On-site security and first responders were by his side within seconds, but sadly the man passed away a short time later at a hospital," New York State health Commissioner Howard Zucker said in a statement to [Fox5NY.com](https://www.fox5ny.com).

The incident occurred approximately 25 minutes after he was vaccinated, and following the required 15 minute observation period. Heath officials say he exhibited no adverse reactions or any

CA woman, 78, gets COVID-19 vaccine, then suddenly dies of something else

February 14, 2021 | 12:23am

The woman "passed away unexpectedly" Friday after receiving Pfizer's version of the Covid-19 vaccine about noon at the Kaiser-run site at Cal Poly Pomona, 30 miles east of downtown Los Angeles, the doctor said.

"While seated in the observation area after the injection, the patient complained of feeling discomfort and while being evaluated by medical personnel, she lost consciousness," he said. "Paramedics on scene began CPR almost immediately and continued, but she ultimately could not be revived."

She required CPR within 15 minutes of shot but media claims her death was not related to vaccine (without evidence or autopsy results)

sky news

The family of an Italian woman who died weeks after having the Oxford-AstraZeneca coronavirus vaccine have told Sky News they are taking legal action to establish whether the jab was to blame.

The case comes after 55-year-old Augusta Turiaco, from Messina, Sicily, received her **COVID** jab on 11 March before her condition worsened in the days following her vaccination.

The music teacher was keen to receive a jab as she worked with young people and even expressed her joy at getting the dose in a Facebook post, writing "fatto" – the Italian word for "done".

She developed a high temperature and a very bad headache, before going for blood tests and ultimately scans that identified blood clots.

She fell into a coma on 28 March and died on 30 March – 19 days after having the **AstraZeneca** injection.

"My sister was in excellent health, she did not take drugs because she did not have diseases such as hypertension or diabetes."

Medical records seen by Sky News showed blood clots had formed in Ms Turiaco's body, including in her brain.

Her platelet levels had fallen.

These are conditions also found in others who died after having the Oxford-AstraZeneca vaccine.

The legal proceedings launched by the family are just one of a number of cases across Europe being mounted against AstraZeneca.

The family's lawyer, Daniela Agnello, told Sky News: "The excellent state of health of Ms Turiaco, the absence of previous pathologies, the very short period of time between the administration of the vaccine, the appearance of the first illnesses and the very serious clinical picture and then death."

It is with great sorrow that we're announcing the sad news that Lesley's eldest daughter Bernice has suddenly passed away.

Our condolences go to Bernice's husband Chino Rhoades, to Lesley her mother, to the Rhoades family and to all Gibb family members.

Bernice got very sick after having had the second coronavirus vaccine and went to bed. Her husband, Chino found her, hours later after coming home. She had passed away and he is heartbroken. (April 15, Las Vegas, Nevada).

Chino Rhoades

April 19 at 5:04 PM · 🌐

There is a gigantic hole in my heart. My wife of 31 years Berry Gibb-Rhoades, sang her last note on this earth on April 15th, 2021 and passed away peacefully with our dog by her side. Her passion for singing was only bested by the caring of our dogs and of me. (Yes in that order 😊) She was born September 29th, 1964 in Sydney, Australia to Lesley Gibb. She was adopted and raised by (Dad) Hugh Lesley Gibb and (Mum) Barbara Gibb. I am sure her Brother Andy Gibb had a hand in that too. I feel a little better knowing that she is joined in Heaven by Dad, Mum, Andy, Maurice and Robin as well as our 5 pups. My heart goes out to the entire Gibb, Evans and my family as she was taken from us way too soon. I want to thank all the family, friends and fans for the outpour of heart felt condolences.

Vaccino Astrazeneca, Fdl to the Minister of Health: "Evaluate the suspension"

Two deaths occurred in the Catania area after the administration of the anti Covid serum: the Meloni party has announced a parliamentary question. A member of the navy and a policeman on duty in Catania died a few days later: the prosecutor is investigating

Following the death of Stefano Paternò, a Navy soldier, originally from Misterbianco and of Davide Villa, a policeman on duty in Catania, the deputy Edmondo Cirielli of Fratelli d'Italia intervened, announcing a parliamentary question on the Astrazeneca vaccine. Both Paternò and Villa had in fact received the first dose of the anti Covid serum and there are investigations by the prosecutor in progress.

"I will present a parliamentary question to the Minister of Health Roberto Speranza on the possible danger of the Astrazeneca vaccine, whose administration has been suspended as a precaution in Austria, Estonia, Lithuania, Luxembourg and Latvia and today also in Denmark - says the FdI parliamentarian. - The situation is also very worrying in Italy, given that two members of the Sicilian law enforcement agencies died suddenly after receiving the very first dose of this vaccine in recent days. Therefore, I will urgently ask Minister Speranza on the basis which guarantees the Government has entrusted to AstraZeneca for the supply of vaccines and what actions it intends to take to protect the health of Italians "

CATANIA TODAY

Davide Villa, Catania policeman, died shortly after taking the Covid vaccine

Meanwhile, the autopsy of the military Stefano Paternò, who died of cardiocirculatory arrest in the hands of the resuscitators of 118 twenty-four hours after inoculation of the vaccine, was scheduled for tomorrow afternoon at the Cannizzaro hospital in Catania. The investigation is based on the Astrazeneca

Uttar Pradesh: Woman dies after taking COVID vaccine, kin create fuss at Ballia government hospital

BALLIA (UTTAR PRADESH): Family members of a woman created a ruckus at a government hospital here as she died after being administered an injection by a doctor, according to police. Pushpa (45) of Bahadurpur village was taken to a Garhwar hospital following pain in her chest and a doctor administered an injection while referring her to the district hospital.

Citing the family members, police said froth came out of the woman's mouth and nostrils after she was given the injection. Her family members created a ruckus in the hospital following her death. They were placated by police and the body was sent for a post-mortem.

"It is with a heavy heart that we announce the unexpected passing of Blanche Mamo" Ibragg Parish church said on Sunday. And of course, it was unexpected. Blanche Mamo, 67, was perfectly healthy up until last week.

Her husband, Albert Mamo is in shock. He's just lost his wife, a much loved figure in the community who taught catechism to generations of young people. Until her retirement 8 years ago she was a dedicated teacher at the Paola government junior school. Later she took up a part time role as teacher at San Anton School.

Albert recounts the story, speaking to SideStreet about the events leading up to her death:

13th March

On the day he and his wife were vaccinated, Albert felt fine except for a sore arm. His wife, on the other hand, immediately started to report feeling exhausted and feverish.

19th March

Blanche Mamo is feeling feverish again, this time for three consecutive days. Suspecting she may have contracted COVID, she took a PCR test and the result was negative.

27th March

Ms. Mamo was still feeling unwell and now her speech had become incoherent. The following day, she woke up late and could not eat or drink. Albert asked one of his daughters to call her mother and speak to her. His daughters confirmed that their mother was not herself. She was clearly suffering from something that made her unable to speak and communicate properly.

28th March

Albert asks his wife to join him to church so that they could pray. She stood up, put on her mask and proceeded to the door in her underwear. Panicked, Albert called a doctor who advised him to take her to the Hospital Emergency. She was immediately diagnosed with a blood clot in her brain.

Parrocca Ibrag

Don Bosco teacher of Palermo died of thrombosis: she had the AstraZeneca vaccine 10 days ago

March 28, 2021

The 46-year-old teacher, Cinzia Pennino, hospitalized last Friday in the intensive care unit of the Palermo Polyclinic, died. The woman died as a result of complications from a thrombosis.

The teacher had received the AstraZeneca anti-Covid vaccine a week before admission. Then the situation degenerated in a few days.

The Policlinico di Palermo reported the 46-year-old's death to the judiciary and AIFA. "The patient arrived at the Paolo Giaccone Polyclinic in Palermo on March 24 in very critical conditions with extensive deep thrombosis and an anamnestic history in which there is also a vaccine administration. - says the hospital in a note - Transferred to the Intensive Care Unit in dysfunction multiorgan despite the advanced treatments and care provided by health workers, she died this morning. As expected in this circumstance - he concludes - the case was reported to AIFA and the judicial authorities".

Koronavirus: Investigation into the causes of death of a 65-year-old woman in Ilion - She was vaccinated half an hour ago

Investigation into the causes of death of a 65-year-old woman with underlying diseases who was found dead about half an hour after she was vaccinated in Ilion.

The unfortunate woman had gone to the health center in Ilion to get the AstraZeneca vaccine, the first dose. According to information, the 65-year-old suffered from diabetes. He did the dose, reported no history of allergies or other conditions, and remained in the center for 20 minutes after vaccination.

Half an hour after her vaccination, she was found unconscious in a park next to the health center. She was taken to the health center for first aid, but despite the efforts of doctors, the woman did not return.

19 health workers dead after COVID-19 vaccination; health experts demand investigation

The COVID-19 vaccination drive was kicked off on January 16 in India. Since then, at least 19 health workers have died post-vaccination. Doctors and public health experts write to the health ministry, demanding an investigation into the deaths.

On February 1, 47-year-old Mannu Pahan, a health worker from Ranchi in Jharkhand, died within 48 hours after being vaccinated against COVID-19. He died at the Medanta Hospital and his body has been sent for a post mortem.

Pahan is one of the 19 health workers in the country to lose his life after receiving the COVID-19 vaccination since the launch of COVID-19 immunisation drive on January 16.

While the government has denied any connection between the deaths and the vaccine, the country's public health officials, wrote to the Union ministry of health and family welfare on January 31, raising questions and demanding an immediate investigation into the deaths.

The letter also demanded that the minutes of AEFI committees formed at the national, state and district levels on adverse incidents arising post-vaccination, be made public. The letter drew attention to several facts: the death of health workers has occurred within a few hours to up to five days after taking COVID-19 vaccine; the deceased were aged between 23 and 56 years; media reports highlighted cardiovascular problems or brain trauma as the cause behind each of the deaths;

"So far, most of the cases of COVID-19 vaccine deaths have reportedly been due to cardiovascular and brain trauma. All these groups need to be examined immediately so that, at least, the reasons behind it are known," Amar Jesani, an independent consultant, researcher and teacher in bioethics and public health told Gaon Connection. He is also editor of *Indian Journal of Medical Ethics*, and one of the signatories of the letter. Jesani urged that the investigations be made public so that

Hospital blamed over women's death from heart inflammation after vaccination

By TOI STAFF

2 April 2021, 8:58 pm

capture: Channel 13 news)

Shirel Hilel, 22, received her second vaccine dose two weeks ago, her sister Nofar told Channel 13 news, in a segment aired Thursday evening. She later reported feeling unwell and said she was experiencing muscle pain.

However, Hilel's condition worsened and she began to have difficulty breathing and pains in her chest and was taken to Safed's Ziv Medical Center.

At the hospital, Hilel was diagnosed with myocarditis, inflammation of the heart muscle, which boyfriend Eyal said the doctor compared to a swollen shoulder.

"On the last day of hospitalization, a deterioration in her situation began. Persistent heart rhythm disturbances developed that didn't respond to care and after continued resuscitation, she was pronounced dead. We share in the sorrow of the family over the heavy loss," it said in a response to the network.

Last month, the Health Ministry instructed hospitals to report any cases of heart inflammation among the vaccinated.

"After several such cases of this type happened close to receiving the vaccine, it was decided to put a specific focus on this issue," Tal Brosh, head of the Infectious Disease Unit at Assuta Medical Center in Ashdod, told the Ynet news site at the time.

Mother demands answers after her son, 20, died less than 12 hours after receiving a Pfizer jab

Mr Garrett had muscular dystrophy and had been shielding for around a year so was 'excited' when his turn to get a vaccine meant he could finally 'live his life'.

'He was excited about going to get his Covid jab and being able to get back out into the world and live his life.

'It wasn't even 12 hours after his Covid jab that he died.

'His whole body was in horrendous pain, he had a really high temperature; normally with his condition, his legs can end up in pain but this was different.

'Before he died, the arm he got the injection in was really painful.

Mr Garrett was given the vaccine at Ballochmyle Medical Practice shortly after 3pm on February 8.

By midnight he was unwell. Paramedics rushed to help Mr Garrett, but nothing could be done to save him. He died around 2.30am.

'The post-mortem showed his heart was in a perfect condition. He had never had a seizure before.'

'Fun loving' mum, 34, dies days after having AstraZeneca vaccine

Damien Lockwood's wife Kimberley suffered a bleed on the brain days after having her coronavirus vaccine

The heartbroken husband of a woman who died days after getting her Covid vaccine has paid tribute to the woman he said was "loved by everyone".

Kimberley Lockwood was just 34 when she died following a "catastrophic brain bleed" 10 days after having her AstraZeneca coronavirus vaccine, her shellshocked husband, Damien, said.

He said: "Kim had the vaccine on March 14 and two days after she obviously had a bad headache, felt a bit coldy and symptoms like that.

When Kimberley arrived at hospital, Damien said that a blood test found that she had a very low blood platelet count and would require a transfusion of vitamin K, which can help to increase a person's platelet count.

But, shockingly, the following day Damien received a phone call to say that he would need to come to the hospital to say goodbye - as Kimberley had suffered a "catastrophic" bleed on the brain and would not survive.

JAN - gets 2nd shot **FEB - "stroke-like" symptoms** **APR 3 - dead**

Manchester Evening News

Rachel McKinney, 35, leaves behind her husband Kevin, stepson and two sons aged 8 and 12, after her tragic death on April 3.

The care home nurse from Stockport began developing symptoms of confusion, and slurred speech in February this year.

She had received both doses of the Pfizer vaccine in December and January and reported classic side effects, her sister Gemma said.

But a month later, her family became increasingly concerned as she displayed signs of a stroke, and Rachel was advised by 111 to attend Stepping Hill Hospital.

Due to Covid restrictions, her family were not allowed to accompany Rachel, and received a text to say she'd had an MRI scan which showed she had inflammation of the brain.

After arriving at Salford Royal Hospital, Rachel started suffering from seizures, and a decision was made to place her into a coma.

NC woman died from massive brain aneurysm 2 days after getting Johnson & Johnson vaccine, daughter says

Posted: Apr 16, 2021 / 12:45 PM EDT / Updated: Apr 16, 2021

CHARLOTTE, N.C. (FOX 46 CHARLOTTE)- A local woman says her mother died two days after receiving the Johnson and Johnson vaccine. She believes the dose is what caused her mother's sudden death.

FOX 46 sat down with Allyson Hendrix, who said her mother was someone who helped other people out a lot and now that she's gone, Hendrix said she has a huge hole in her life.

Hendrix says her mom decided to get one of the COVID vaccines and settled on the Johnson & Johnson.

"She was like, 'I'll just go do that, it's easier, I don't have to do that, you know, two trips.' She got that on March 30." Then two days later, she was in the hospital.

"They couldn't figure out what was going on, so they did a CT scan and that's when they found all the bleeding on the brain," she said. "It was so massive at first that they thought it was actually two aneurysms, but it was only one. It was just so big." On April 9, Darlene Blackwell passed away.

"That night that, we decided to we had to end life support. We were sitting at my grandmother's house and the news was kind of turned down on low but I was reading the headlines and it said Johnson & Johnson vaccine put on hold and it was stopped," Hendrix said. "It just hit me like what it that happened."

Oregon woman dies after getting J&J vaccine, state health officials say

by KATU Staff Thursday, April 22nd 2021

PORTLAND, Ore. (KATU) - An Oregon woman died this week after she received the Johnson & Johnson coronavirus vaccine, the Oregon Health Authority (OHA) said.

State health officials said they received information from the Centers for Disease Control and Prevention (CDC) about the death, and that the government agency was investigating.

Until the CDC completes its investigation, officials said they cannot officially say whether her death is related to the vaccine.

The OHA said the woman, who was in her 50s, received the vaccine before the U.S. ordered a 'pause' on its use.

They say she developed a rare but serious blood clot within two weeks of receiving her vaccination.

Portuguese health worker, 41, dies two days after getting the Pfizer covid vaccine as her father says he 'wants answers'

- Sonia Acevedo suffered a 'sudden death' on New Year's Day 48 hours after jab
- The 41-year-old mother-of-two worked in paediatrics at a hospital in Porto
- Ms Acevedo had not suffered any adverse side-effects after being vaccinated

'She had the Covid-19 vaccine but she didn't have any symptoms. I don't know what happened. I just want answers.'

'I want to know what led to my daughter's death.'

Ms Acevedo's employers confirmed the dead woman had been vaccinated against coronavirus on December 30 and said they had not been notified of any 'undesirable effect' when she was jabbed or in the hours afterwards.

The Portuguese Institute of Oncology said in a statement: 'With regards to the sudden death of an operational assistant from the Porto IPO on January 1, 2021, the Board of Directors confirms the event and expresses sincere regret to family and friends in the certainty that this loss is also felt here.'

AFTONBLADET

Christina, 61, died after covid-19 vaccine.

Family: We demand an apology from Astra Zeneca

Of. **Susanna Nygren** ✉

PUBLISHED: MON 12 APR 2021

UPDATED: TUE 13 APR 2021

NEWS

Christina, 61, died after receiving Astra Zeneca's covid-19 vaccine. Doctors have determined that she was a healthy woman who after vaccination got a fatal coagulation disorder.

Christina's family is now demanding an apology from Astra Zeneca and the Medical Products Agency.

- This must not happen again. Christina must not just be a number in the statistics, says Daniel, one of Christina's sons.

On February 17, 61-year-old assistant nurse Christina was vaccinated with [Astra Zeneca's](#) covid-19 vaccine. She had felt anxious before the vaccination but still decided to take the injection in solidarity with the elderly she took care of at work.

Christina continued to feel unwell. She had a headache for several days - only to feel a little better one day - then the headache returned, now with cold sweats and nausea.

Gets worse for several days

One week after the vaccination, Christina had severe stomach problems. She vomited and had diarrhea. In addition, she suffered from double vision, something she had never had before.

It did not go over.

In the end, Christina only vomited bile and was not allowed to keep any food at all. She called her son Daniel in a panic.

- She said that "you have to drive me to the emergency room".

The next day, the doctors had managed to stabilize Christina's condition by adding two bags of platelets.

- The platelets were raised to a more stable level, Daniel explains.

But early Sunday morning, Christina's condition deteriorated drastically. She had a cardiac arrest and then a brain haemorrhage. Her doctor contacted her husband Thomas and explained that the situation was serious. He hurried to book a plane ticket home.

The doctors in charge explained to the family that they had not been able to determine a 100% cause of death, but that they had not been able to see any other probable cause than the vaccine.

The hypothesis is that the vaccine has caused a so-called disseminated intravascular coagulation, a condition in which the blood begins to coagulate too much and many blood clots form simultaneously in several places in the body. In the final stage, massive internal bleeding occurs.

The hospital reported the death to the Medical Products Agency as a suspected serious side effect of the vaccine. After the autopsy, it was established that Christina was a previously healthy woman without underlying diseases.

After the vaccination, she had suffered from six different life-threatening conditions, which occurred more or less in parallel with each other:

- Massive cerebral hemorrhage
- Myocardial infarction
- Plugs in the left lung
- Bleeding in and around the adrenal gland
- Heavy bleeding in the intestinal system
- Plugs in the venous system

Woman Dies 40 Minutes After Receiving Sinovac COVID-19 Vaccine

Shortly after receiving a dose of the vaccine made by Chinese company Sinovac at a vaccination center in Metepec last Thursday, the woman started feeling weak and fainted when she got up to go to the washroom. She was rushed to the IMSS clinic in Metepec shortly after fainting but was declared dead on arrival.

Several newspapers in Mexico, including Milenio and Sin Embargo, reported at the time that she died 15 minutes after getting vaccinated. The federal Health Ministry, however, indicated that the 75-year-old passed away 40 minutes after inoculation, according to the latest reports.

DMX Received Covid Vaccine Days Before Heart Attack – Family Says NO DRUGS

12 hours ago Last Updated: April 8, 2021

Rap legend DMX, real name Earl Simmons, is currently in the ICU after suffering from a massive heart attack. Early reports speculated that DMX's condition may have been brought about because of an alleged drug overdose.

But MTO News spoke with a member of the Simmons family who believes that it was NOT drugs that caused the heart attack.

In an EXCLUSIVE interview, MTO News spoke with DMX' family member who told us that the rapper received the COVID vaccine about a week before he suffered from the heart attack.

DMX's family member told MTO News, "[DMX] got the vaccine when they opened it up to people over 50. He got it so that he could go travel and perform, stuff like that."

And the family member suspects that DMX heart attack could have been a reaction to the vaccine. The family member explained, "Everyone [in the news] keeps saying that [DMX] had a drug overdose. How do they know. I'm in the family and no doctor told me anything about an overdose."

The family member is FURIOUS about the speculation surrounding DMX drug use. She told MTO News, "Yes he had past issues with drugs. But nobody knows that he had an OD. It's f**cked up that its being reported like that."

The grieving kin explained, "He took that vaccine, and he had a heart attack."

Nurse dies in Georgia after being vaccinated with AstraZeneca

Bakradze was vaccinated on March 18 at 12:15 (local time), and then gave an interview to a local media stating that "vaccines are needed, we are powerless against the virus, we must vaccinate ourselves to avoid diseases or not get seriously ill. Although people are afraid, there is nothing dangerous about getting vaccinated. I urge everyone to get vaccinated."

The day after receiving the injection with the AstraZeneca, the young nurse fell into a coma in a hospital in the Georgian city of Ajaltsije, and despite the fact that that night had stabilized, this Friday her heart stopped and the doctors were unable to revive her.

Akhaltsikhe Clinic Doctors and Nurse Charged in Megi Bakradze Case

The Prosecutor's Office of Georgia has charged the two doctors and one nurse of Akhaltsikhe Clinic Imedi with providing false information on the case of **Megi Bakradze's death** to the investigation.

Italy Opens Manslaughter Probe as Teacher Dies Hours After Getting AstraZeneca Vaccine

BY JACK PHILLIPS | March 16, 2021 Updated: March 16, 2021

Italian officials have begun a manslaughter investigation following the death of a 57-year-old music teacher hours after receiving AstraZeneca's COVID-19 vaccine, according to local media reports.

Officials have so far said there is no evidence of a direct link between the man's death and his shot.

Prosecutors in the northern Italian region of Piedmont announced they opened a manslaughter probe into the death of Sandro Tognatti, who received the vaccine in his hometown of Biella on March 13. His wife told news outlets that he went to bed that night with a high fever. The next day, she said, an ambulance was called for him, and he later died.

The local prosecutor in Biella, where Tognatti lived, [announced](#) the opening of a criminal case for manslaughter after his death, [Italy's La Repubblica newspaper](#) reported.

Tognatti's death came just days after a 60-year-old Danish woman suffered highly "[unusual symptoms](#)" and died after receiving the vaccine, the Danish Medicines Agency said this week. The woman had a low number of blood platelets and clots in small and large vessels, as well as bleeding, it said, reported Reuters.

"It was an unusual course of illness around the death that made the Danish Medicines Agency react," it said in a statement late on March 14.

Norway said on March 13 that three people, all under the age of 50, who had received the AstraZeneca vaccine were being treated in hospital for bleeding, blood clots, and a low count of blood platelets, which were labeled "[unusual symptoms](#)" by health authorities.

Union workers in India are protesting after deaths

Andhra Pradesh ASHA Worker Dies After Receiving Covid-19 Jab; Unions Protest

Promila Devi, 55, a frontline health worker died due to serious complications she developed after getting vaccinated for Covid-19 at Hamirpur district in Himachal Pradesh.

Confirming about the death, Dr Janak Raj, Senior Medical Superintendent, Indira Gandhi Medical College, Shimla said the patient was shifted to IGMC from Dr Rajendra Prasad Medical College, Tanda (Kangra) only a few hours before she died.

After initial treatment and reviewing her condition, she was rushed to Tanda, where he was treated for her kidney failure. She was tested for Covid-19 also she was negative. She was also on ventilator support. As condition became precarious on Saturday, she was brought to IGMC Shimla," he said.

Chief Medical Officer (Hamirpur) Dr Archana Soni said the death of the Anganwadi worker after vaccination is a matter of concern. The higher authorities in the government have been apprised of the circumstance.

Dr Janak Raj released a letter written by union Additional Secretary (Health) Manohar Agnani asking the state governments to take strict measures after any death following vaccination of the frontline workers in the country.

ASHA workers staged a demonstration in front of the GGH demanding that a compensation of Rs 50 lakh be paid to the deceased's family.

Moradabad: Ward Boy Dies 30 Hours After Taking Covishield, ACMO Denies Vaccine Caused Death

46-year-old Mahipal Singh, a ward boy at the Moradabad district hospital died about 30 hours after he received the Covishield vaccine. While his family members have alleged that he fell sick only after receiving the vaccine, Additional CMO of Moradabad district, Dr Dinesh Kumar Premi, while speaking to Outlook, said that Singh died due to a heart attack and that his death has nothing to do with the vaccine.

Which vaccine was he administered and when?

He was administered Covishield on January 16 at 1 PM at the District Main Hospital. He was kept in the hospital for observation for some time as we did with all the other vaccinated individuals. He didn't show any symptom of any side effect. At the time of his release from the hospital, he was completely fine and he had neither any fever nor any rashes or anything.

Then in the evening, he developed chest pain again and faced breathing issues. His family rushed him to the district hospital. He was admitted in the emergency ward and the doctors found him dead. He died on the way to the hospital.

Anganwadi Worker Dies After Covid-19 Vaccination, Govt Orders Probe

The 44-year old ASHA worker complained of severe headache and fever on January 22, three days after she took a shot of the coronavirus vaccine.

"We first took her to a private hospital and later shifted to the GGH as her condition worsened. She was a very fit person and rendered tireless service during Covid-19 time," the ASHA worker's brother said.

**Benjamin G.
Goodman**

Benjamin Goodman went to a Walgreens pop-up COVID-19 “vaccine” clinic in Chelsea, New York on Saturday, March 13. He received the Johnson & Johnson shot, according to his stepmother Pamela Goodman. Benjamin texted his father, Jeff Goodman, and told him he received the shot. Benjamin had a severe headache and started feeling ill. He fell asleep, hoping the symptoms would pass after some rest. Mr. Goodman woke up at 1 a.m. with a high fever and chills. His fiancée, Lindsay Janisse, was awakened to Mr. Goodman having seizures at 4 a.m.. Ms. Janisse called 911 as Mr. Goodman went into cardiac arrest. Paramedics tried, unsuccessfully, to revive him on the scene. Mr. Goodman was rushed to a nearby Mount Sinai Hospital. But he was pronounced dead at 6:05 a.m. Sunday morning, March 14.

8:35 LTE

Pamela A Everett-Goodman 2h 24

Dear friends, there is nothing that can bring our son Ben back. Jeff, Natasha, Carson and I cannot let the truth of what happened to Ben pass with any of you thinking he had some type of underlying health problems that caused his death. He didn't. Ben just celebrated his 32nd birthday, was working full time, golfing, traveling and living the best life he could in NYC. Ben knew our family history with vaccines. He knew. But everyone has been pushing the experimental travel pass and so many things we know and many others do not.

We are very aware and respect every persons choices and medical freedom. This is what happened to our son. There is no B/W or grey, the autopsy came back suspicious and inconclusive pending further investigation.

We don't need to wait for anything, we already know what happened. Nothing can bring him back.

EFFINGHAM, Kan. (KSNT) – An obituary posted online Wednesday night states that a Kansas woman died after a reaction to the coronavirus vaccine, according to KSNT News.

The first line of Jeanie Evans' obituary states, "Jeanie M. Evans, 68, of Effingham, Kansas died unexpectedly on Wednesday, March 24, 2021, at the Stormont-Vail Hospital from a reaction to the Covid vaccine."

Evans received her shot the day before her death in Ozawie at the Keystone Early Learning Center.

Once she started experiencing a reaction to the vaccine, Evans was taken by ambulance to Topeka's Stormont Vail Hospital.

Evans was pronounced dead at the hospital, a day after receiving her first COVID-19 shot.

The Kansas Department of Health and Environment confirmed it is investigating the death alongside federal partners.

Posted March 25, 2021 6:20 p.m. EDT

As a college professor who worked in person with her students at Appalachian State University and spent lots of time caring for her two grandchildren, 63-year-old Virginia Ellington was counting the days until she could be vaccinated against COVID-19.

"I have texts from her saying how excited she was to get it," her daughter, Ingle, said.

Ingle said her mother and father got the Johnson & Johnson vaccine on the morning of Monday, March 8, at the Watauga Health Center in Boone.

Ellington started feeling very tired and even asked her husband about possible vaccine side effects, Ingle told WRAL News.

Ellington went to work the next day but was still feeling unwell, according to her family. On Wednesday, March 10, she stayed in bed. A little while later, her husband returned to the bedroom to find her unresponsive.

"He tried giving her CPR, and he called 911, and they said she was gone when they got there," Ingle said.

Ingle said the local doctor, who did a preliminary examination, told the family that her mother died of a stroke. The local medical examiner, a paramedic and a teacher who signed the death certificate, wrote that the vaccine was one of the "significant conditions contributing to her death."

Healthy 36-year-old surgeon dies from Multi Symptom Inflammatory Response weeks after taking 2nd shot

Doctors suspect COVID delayed immune response in young surgeon's death

By [Jane Roberts](#), Daily Memphian

Updated: February 12, 2021 6:43 AM CT | Published: February 10, 2021 6:27 PM CT

A young orthopedic surgeon with OrthoSouth who died early Monday, Feb. 8, may be the nation's first case of an adult who died of a delayed immune response to COVID and had received the vaccine.

Dr. J. Barton Williams died early Monday at Baptist Memorial Hospital-Memphis. He was 36.

"What we think so far is that he suffered from multi-system inflammatory syndrome (MIS)," said Baptist infectious disease expert Dr. Stephen Threlkeld.

The syndrome, more common in children, often looks and acts like Kawasaki disease, which causes inflammation in the blood vessels.

MIS is a reaction in someone who has had the COVID infection weeks or months earlier and mounted a severe, delayed immune reaction, which often causes significant damage to the organs.

Williams told doctors he was not aware of having had COVID and he tested negative several times in the hospital, which is not unusual, Threlkeld said, because he could have had COVID long enough ago that he would no longer test positive.

MIS is essentially an unchecked immunological response to the virus, said Dr. Scott Strome, executive dean of the College of Medicine at University of Tennessee Health Science Center.

Dr. J. Barton Williams

Dr. J Barton Williams, called a student of medicine and science, went from doctor to patient when he fell ill weeks ago. Dr. Stephen Threlkeld helped treat him at Baptist Hospital.

Threlkeld says the disease quickly went from diagnosis to death.

"It was matter of days," Threlkeld said. "Just a tragedy."

Threlkeld says Williams tested positive for COVID antibodies, meaning he had COVID at one time, but he never knew it. And he had gotten his second COVID vaccine just weeks before his death.

MUMBAI: A 61-year-old radiologist from Ulhasnagar passed away on Sunday, 11 days after receiving the Covid-19 vaccine. Following his death, messages were circulated on social media speculating whether his death was linked to vaccination. 1 Dr Tulsio Gawalani received Covishield on January 20, along with his nephew Pawan, also a radiologist. The family said he suffered a heart attack at 9.30 pm on Sunday and collapsed at his home. Pawan and Gawalani had taken the vaccine 11 days ago.

Kerala dental student dies after receiving vaccine jab

Published: 26th February 2021

Complaint filed as student dies after taking vaccine

The death of a BDS student after getting vaccinated has led her family to file a complaint at the local police station in Kozhikode district. The family has alleged that the negligence of the Pariyaram Medical College authorities led to the death of Mitha Mohan (24), a final year BDS student.

She had received the vaccine at the Pariyaram Medical College and began experiencing headache and vomiting thereafter. Her test results later showed that she was Covid positive, according to Manorama Online. She was admitted to the isolation ward of the teaching hospital, but the hospital authorities couldn't save her life.

It was earlier in 2021 that 24-year-old Mitha Mohan, along with her batchmates took the first shot of Covishield, the **COVID-19** vaccine developed by the University of Oxford and produced by pharma giant AstraZeneca. The second shot was due in a few days for her, a Bachelor of Dental Surgery student of Government Medical College, Kannur and her batchmates. However, her classmates remember how Mitha developed rashes, allergies and vomiting, following which she was subjected to an RT PCR test and her result turned out to be positive. Two days ago, Mitha succumbed to the virus.

The protest which is being organised by the students' union chairman Vinayak Vijay has entered its third day. The students say that they will continue the protest until the college comes out with a statement. "The second shot of our vaccine is due in a few days. We do not know if the vaccine caused her death, but had the treatment been better, Mitha would have still been alive," says Sreelakshmi. Earlier, a health worker who received the vaccine jab had also died in Telangana.

MAR 4 - dead

THE FREE PRESS JOURNAL

Jaipur: A 60-year-old man died on Thursday morning, 20 hours after getting vaccination for Covid-19 in Kota.

The deceased, Bahadur Singh was a farmer hailing from Gar-modi village in Kota district, 150 km south of Jaipur.

Singh had got the first dose of the vaccination at the Primary Health Centre in Baluheda at around 1 pm on Wednesday. He was monitored for half an hour at the health centre after which he went home.

Singh's brother Govind said that after getting the vaccine, Bahadur felt dizzy on Wednesday evening and went to sleep. When he woke up on Thursday morning, he again complained of dizziness. He had some tea but soon after he fainted and then died.

His family took him to the Community Health Centre in Kait-hoon where doctors declared him dead.

Govind claimed that Bahadur's condition deteriorated and he died after getting the vaccine. Govind said his brother was fit and did not have any illness.

Honored to be a part of administering the 2nd dose of the Pfizer vaccine to the first 5 recipients in Chicago. While I understand the hesitancy of many regarding receiving the vaccine, I'd like to encourage all those who qualify to be vaccinated. Initially I was also hesitant but was reassured with some research and clarifying my doubt through reading. Many of my colleagues likewise have received the vaccine and have not experienced any severe side effects. I have received the vaccine myself and only experienced shoulder soreness thus far. I do believe that the benefits of this vaccine certainly outweigh the risks given its low side effect profile. Be

day to wash him and change the bedding, and physios to work on getting him on his feet again. He'd got a little more movement and had even managed to sit on the side of the bed unaided on Thursday but on Friday morning when me and the carers were seeing to him he started gasping, I couldn't feel a pulse and one of them started chest compressions until the paramedics came. But in short yes he only fell ill after having the vaccine and died exactly two weeks after having it.

Stefano Paternò, 44-year-old Petty Officer from Italy, died 16 hours after receiving AstraZeneca shot from thrombosis (brain bleed).

lasiciliaweb

Mom why did dad die?"

CATANIA - " My son asked me: ' mom why did dad die? ' And I have to give him an answer ". So Caterina Arena, wife of Petty Officer Stefano Paternò, who died last Tuesday, sixteen hours after receiving the first dose of AstraZeneca vaccine, explains the reasons why she presented an exposition after the sudden death of spouse. " My husband was a humble person, loved by all, always available to everyone and never wanted anything in return. He was generous, yummy. He vaccinated himself and said that the only solution to get out of this pandemic was precisely the vaccine so he recommended it to everyone - continues Caterina Arena, mom of two 11 and 14 year olds -. For example, to mine - year-old mother said: 'Next turn is yours, please get vaccinated' ".

Initially the vaccine dose caused Paternò only a temperature rise, contrasted with Tylenol. " He was fine, he even recovered after a bit of fever. And then at night I wake up because he starts shaking, he had his eyes open and the look was in the blank and I immediately realized that the situation was serious. Called my brother 118 and we started CPR. Then the doctors arrived, after 45 minutes, and they declared the death ". Catherine Arena tried to react, to give herself answers: " For my children, for me, for everyone, because it can help the whole community ".

" Consultants recommend a more critical attitude to deepen the findings and to be able to judge at least after the Histological Examination. But we'll have to wait for twenty days explains Advocate Dario Seminara. The attorney has appointed five experts who participated in the autopsy arranged by pm Gaetano Bono, who directs the investigation coordinated by Chief Prosecutor Sabrina Gambino. This is Angelo Indelicato, Giancarlo Guerrera, Lucio Di Mauro, captain Francesco Oristanio, and Dario Condorelli. The family has always supported a correlation between vaccine administration and Paternò's death. And the news of the momentary withdrawal of the vaccine in Italy doesn't surprise us.

" It was a duty to caution the community while awaiting the resolution of the questions put by the prosecutor: it's only right that it should be done so that we can see if other than the temporal nexus that is evidently there because this is a case where death occurs at a distance of distance Just 16 hours of vaccine administration, we need to see if there is actually an etiological link between the vaccine and the death - this is exactly the answer that will give us the autopsy. We've certainly made many assumptions, but I can't say them now because it's right to check them in the light of the history examinations ".

The Prosecutor of Messina, investigating the death of Davide Villa, Catania's Crime Police officer who died on March 7, 12 days after the administration of the AstraZeneca vaccine, will acquire the historical findings already used for the first investigations started by pm of the ethnea city, which then forwarded the dossier to colleagues in the City of the Strait.

AstraZeneca vaccine: 'Doctors had inkling it was the Covid jab', say family of blood clot victim, 51

EXCLUSIVE

inews.co.uk / April 15, 2021

Like so many others, Michelle Barlow was delighted to get her **coronavirus** vaccine. The mother-of-two and her husband, Ian, booked their appointments as soon as they got the call, knowing it was the right thing to do.

But their relief at finally being given the vaccination turned to concern when Michelle fell ill in the days after having the AstraZeneca (AZ) jab on 7 March.

Ms Barlow, 51, had flu-like symptoms in the first couple of days after her jab, which is a common side effect. But a week later she developed severe headaches, diarrhoea and sickness for which her GP gave her medication.

She got "progressively worse and worse" and – as **reports started to emerge** from around Europe of extremely rare side effects from the jab – she was admitted to hospital on 20 March.

She was pronounced dead three days after being admitted to hospital, and is one of at least 19 people who have died from unusual clots soon after having the vaccine.

The civil servant, who had no underlying health conditions, was found to have low blood platelets and two clots on her lungs.

Recalling the moment his wife was admitted to the Royal Albert Edward Infirmary, also known as Wigan Infirmary, Mr Barlow, 56, from Wigan, said: "It was a shock because Michelle was fit and healthy."

"She was active and always walking the dog. She told me that the doctors had said they had an inkling it could well be the vaccine."

According to her death certificate, the cause of her death was pulmonary embolisms and blood clots in her abdomen and portal vein. A coroner ruled she died from natural causes, which her family have asked to be reconsidered after more information about the vaccine's risks have emerged.

VACCINE AWARENESS & SEARCH TO FIND OUT ABOUT MY MOM

**sensitive to read but important

** I'm hoping to spread awareness on possible complications

originally I was going to post my excitement on my second vaccine. Don't get me wrong I took the risk because I was anxious about it covid. I also wanted to see my mom & didn't want to risk giving her covid. I didn't know that the vaccine is actually very risky for people with underlying conditions. my mom passed away on Friday... 1 week after getting her first Moderna vaccine. Her symptoms started the night she got her vaccine (seems to be exactly the same timing the rest of us start getting symptoms). She was a diabetic, had heart disease & kidney disease but all managed and not showing signs of sickness there. NIGHT one her blood sugar dropped and she passed out. We googled and it looked like in rare cases the vaccine could effect blood sugar of diabetics. Her dr told her to just change her insulin until symptoms subsided. Then her blood sugar was high for 2 days (Then it balanced). THEN she was very nauseous and throwing up for 2 days (then that stopped) THEN she had shortness of breath for 2 days. Nothing to call the ER. She thought it was vaccine symptoms that would go away. She passed Friday peacefully.

A TRAGIC dad-of-four died of Covid after getting the first dose of the Pfizer jab just two days before he was diagnosed.

Chris Moore, 48, had been shielding during the pandemic but returned to his job as an NHS administrator at the end of last year.

He was given the first dose of the vaccine on January 2 but began to show Covid symptoms two days later.

Chris, from County Durham, was diagnosed with the virus and taken to hospital with breathing difficulties but sadly died four weeks later.

David said: "Again, he made a little bit of a recovery after seeing Helen but she was told he needed kidney dialysis as well but he didn't really get any better after that.

"They were called again and they were told he was seriously poorly and Helen had to go and be with him. He passed away then.

"Even though Chris hadn't gone out the only days Chris really could have caught Covid were going to work or actually the trip to hospital to get the Covid vaccination, so tragically it could be ultimately that going for a coronavirus vaccination that led to him catching coronavirus.

Naiara Suelen de Souza, 31-year-old Brazil nurse technician and mother of two died 4 weeks after shot. She was healthy with no underlying conditions.

According to him, the professional went on January 25 to Manaus and intended to stay a few days, just to support the family.

The Health Department of Manoel Ribas confirmed that, days before the trip, she had taken the 1st dose of the Coronavac vaccine against the new coronavirus.

" She had nothing comorbidity, she had even had her first dose of the vaccine. He went to AM to see his mother and help his sister with childbirth, just so he didn't have to go to the hospital. She was strong, not media efforts. Mom got Covid, then her sister, then she took care of both of them and then she ended up in ICU ", Uncle Edney Martins Gomes said.

Manoel Ribas Health Secretariat confirmed that, days before the trip, she had taken the 1th dose of the Coronavac vaccine against the new coronavirus.

According to Gomes, the pregnant sister suffered complications from the disease, suffered a bleed and ended up delivering hospital birth. She, the baby and the mother of both are well and home.

" You can't understand. Naiara, who was the least risk apparently, became 100 % dependent on the breathing apparatus and died on Thursday [18]. Before traveling, her husband told me that she laid on his chest and said: 'Hey Marcos, take good care of our kids', and I think that was goodbye ".

Many AEFIs Due to the Sinovac Vaccine, the Government is Still Giving

□ 23 February 2021 □ fnn □ 0 Comments

Vaccination phase 1 began on Wednesday, January 13, 2021, initiated by Jokowi and several other officials who were witnessed by the people on television.

The next day, Thursday, January 14, 2021, then it was the turn for health workers in various regions in Indonesia. Including one of them in the city of Palembang, South Sumatra. Doctor JF took part in stage 1.

Friday morning (15/1/2021), the 48-year-old doctor was found dead in the parking lot of a mini market. Prof. Yuwono said the victim died in the car. The victim has no comorbid and has no history of being hospitalized.

Forensic doctor M. Hasan Bhayangkara Palembang Hospital Indra Nasution said the forensic team found bleeding spots caused by lack of oxygen in the eyes, face, hands and chest.

Previously, another serious KIPI was experienced by the health worker of Ngudi Waluyo Hospital, Wlingi District, Blitar Regency, Erny Kusuma Sukma Dewi (33), who died after being injected with the Covid-19 vaccine, on Sunday, February 14, 2021.

Nakes Erny underwent the first phase of vaccination on Thursday, January 28. Before being injected with the Sinovac vaccine, he also underwent a screening like the others. Erny, who works in the isolation room for positive patients at Ngudi Waluyo Hospital, was declared healthy.

The person concerned does not have comorbidities. Body temperature is also normal. "He passed the screening," said Director of Ngudi Waluyo Regional Hospital, Endah Woro Utami, Sunday (21/2/2021).

Nine days after vaccination (first stage), Erny suddenly experienced symptoms of illness. His body is hot. Also, there was a tightness, which made him immediately rushed to the hospital.

In fact: vaccination starts Thursday, January 14, 2021. Friday (15/1/2021), dr. JF died in Palembang. Sunday (14/2/2021) Erny Kusuma Sukma Dewi was killed in Wlingi. Friday (19/2/2021), DR. Eha Soemantri SKM, MKes also died in Makassar. Monday, 22 February 2021, drg. Bernadi Into. Sp.Prost.

Dr. Eha Soemantri's Swab Results Before Died Negative Covid-19

© Friday, 19 February 2021 15:37

Dr Eha Soemantri, died 3 weeks after her second dose of the Sinovac covid-19 vaccine. The hospital confirms she was negative for COVID prior to death.

Together with several South Sulawesi provincial government officials and Forkopimda in South Sulawesi. On January 28, 2021, Eha received the second phase of vaccination at RSKD Dadi. Eha also had time to share testimonials related to vaccination, after being vaccinated some time ago.

Eha appealed to the public not to be afraid of being vaccinated. "I received a vaccine injection on January 14 after the Governor's announcement of the Covid-19 vaccination," he said in the video testimony.

Note that Google Translate often switches pronouns ('she' translates to 'he')

FAJAR.CO.ID, MAKASSAR - Treasurer of the Association of Indonesian Public Health Scholars and Professionals (Persakmi) South Sulawesi, Dr. Eha Soemantri S.KM, M.Kes passed away. Swab Results Eha before dying shows the result of negative covid-19 .

"The results of the swab before he died , the deceased was negative for Covid," said the public relations of Wahidin Sudirohusodo Hospital Makassar, Aulia Yamin when confirmed by Fajar.co.id, Friday (19/2/2021).

Eha had received special care at the ICU at Wahidin Sudirohusodo Hospital. Eha herself entered Wahidin Hospital after getting a referral from Pelamonia Makassar Hospital.

"He was admitted on February 11, and was referred from Pelamonia Hospital," continued Aulia.

Before dying , Eha complained about shortness of breath and coughing, so she received special treatment at the Wahidin Hospital ICU.

Previously, Eha had received 2 covid-19 vaccinations. In fact, he is also a figure pioneer of vaccination in South Sulawesi. His name is included in the first vaccine recipient in South Sulawesi. Together with several South Sulawesi provincial government officials and Forkopimda in South Sulawesi.

48 hours ago my wife slipped away from me while I was sleeping by her side. I tried cpr and 3 ambulances and a air ambulance arrived. Over 10 people from the NHS tried to save her. But could not. She was Emma Tandy, 38 years old and worked in education. She took the astrazeneca vaccine so she could protect the children, their parents and her family.

I'm here with my 7 year old and 2 year old not knowing what to do next and where to turn. Im struggling to see what my future looks like without her.

Everyone is saying take it step by step but I don't know how at the moment. At the moment I am trying to protect my boys and try to process everything I have witnessed.

ASHA worker dies in Andhra, family alleges adverse event due to COVID-19 vaccine

An ASHA (Accredited Social Health Activist) worker named Vijayalakshmi died in the Government General Hospital in Guntur, Andhra Pradesh, on Sunday. While hospital authorities said that she suffered a brain stroke, her fellow workers and family have expressed apprehensions that she died days after she was given the COVID-19 vaccine. However, government officials have said that the exact cause of death will only be known after the post mortem.

Vijayalakshmi, who was 42, worked as an ASHA in Tadepalli. Her son Sharath told the media that she was healthy before she was given the vaccine on Wednesday, January 20, at the Tadepalli PHC (Primary Health Centre). "She was fine on Wednesday. On Thursday, she said she felt tired, and went to sleep at night saying she was feeling dizzy. Later around 2 am, she got a fever, her blood pressure went down and her condition worsened. Private hospitals refused to admit her, saying it could be an adverse event from the vaccine and told us to go to Guntur GGH."

Sharath also alleged that since his mother was admitted to the GGH, hospital authorities did not communicate her health status and treatment details to her kin properly, until they held an agitation.

Trinidad retiree dies after taking Covid vaccine, and suffering clots, paralysis

April 16, 2021

(Trinidad Express) The 60 year old man who suffered a blood clot and paralysis after taking the AstraZeneca vaccine has died.

The man, a retired Local Government regional corporation health inspector was warded at the San Fernando General Hospital for a week.

Last Wednesday he took the AstraZeneca vaccine at the Princes Town health facility.

By Friday his body became partially paralysed.

A CT scan at a private institution was conducted revealing a blood clot blocking a main artery.

On Thursday Ali pleaded with authorities to not cover up his uncle's ailment but take action to ensure that it does not happen to someone else.

The family shared photographs of the man's body with the Express which showed that his body from the waist down to his toes have turned black in colour.

Ali had said his uncle had undergone CT scans, X-Rays, ultrasound and countless blood samples taken.

Chief Medical Officer (CMO) Dr Roshan Parasram said on Wednesday there are some studies coming out of the European Group where there were 79 cases of a cluster of diseases that occurred in Germany and some other countries in Europe a couple weeks ago.

Parasram said these cases have been investigated by the European Medical Agency as well as WHO (World Health Organisation), which is in the process of doing their final report on that particular cluster. The CMO said there seemed to be a causative link between the vaccine and clotting.

CDC investigates Virginia woman, 45, who died after getting the Johnson & Johnson vaccine last month as US pauses its use over blood clot fears

By HARRIET ALEXANDER FOR DAILYMAIL.COM, 13 April 2021

Virginia is stopping using **Johnson & Johnson's** COVID vaccine after a 45-year-old woman died following her vaccination in March.

The Centers for Disease Control and Prevention (**CDC**) is investigating the woman's death, Virginian health authorities announced on Tuesday.

The CDC's Vaccine Adverse Event Reporting System (VAERS) system notes the woman who died began having headaches six days following vaccination, then was hospitalized once the headache worsened and she had started dry heaving.

A head CT scan showed hemorrhaging expanding up to 1.6 centimeters and eventually, cortical vein thrombosis, as listed in the six other cases.

She died on March 18, **Richmond.com** reported - 12 days after receiving a dose administered by a school.

VAERS does not list any known allergies or underlying medical conditions

23 die in Norway after receiving Pfizer COVID-19 vaccine: officials

By Amanda Woods

January 15, 2021 | 12:12pm

euronews.

STEINAR MADSEN
CHIEF PHYSICIAN, NORWEGIAN MEDICINES AGENCY

Twenty-three people died in Norway within days of receiving their first dose of the Pfizer COVID-19 vaccine, with 13 of those deaths — all nursing home patients — apparently related to the side effects of the shots, health officials said.

Common reactions to the vaccine, including fever and nausea, "may have contributed to a fatal outcome in some frail patients," Sigurd Hortemo, chief physician at the Norwegian Medicines Agency, said in a Friday statement.

The news comes just over a week after officials reported the deaths of just two nursing home residents after they received the Pfizer jab. X

Reports are coming out of Dover Riverside Nursing Home in NH that between four (4) and seven (7) residents have died after they received the COVID vaccine on Monday afternoon.

88-year-old dies hours after COVID vaccination in second such incident

By JERUSALEM POST STAFF DECEMBER 30, 2020 18:03

NEWS.RU

An elderly Israeli man died on December 28 of a heart attack after receiving the Pfizer coronavirus vaccine, the Israeli Health Ministry reported.

The Arutz Sheva Newsletter - Updates, stories and features

Subscribe now

It should be noted that in the three weeks since the start of the coronavirus vaccination campaign, two elderly people died a few hours after receiving the vaccine, but the Ministry of Health estimated that there was no connection between the deaths and the vaccine.

In the first case, a 75-year-old man, a resident of Beit She'an, died as a result of heart failure two hours after the injection. The next day, an 88-year-old man collapsed in his home hours after the vaccination and was later pronounced dead. The Hadassah Mount Scopus

University researchers now have data showing 'significant mortality from vaccine'

Arutz Sheva

www.IsraeliNationalNews.com

Vaccination in Israel: Challenging mortality figures?

Mordechai Sones, Feb 18, 2021

A front-page article appeared in the *FranceSoir* newspaper about findings on the *Nakim* website regarding what some experts are calling "the high mortality caused by the vaccine."

The paper interviews University of Aix-Marseille University Faculty of Medicine Emerging Infectious and Tropical Diseases Unit's Dr. Hervé Seligmann and engineer Haim Yativ about their research and data analysis. They claim that Pfizer's experimental shot causes "mortality hundreds of times greater in young people compared to mortality from coronavirus without the vaccine, and dozens of times more in the elderly, when the documented mortality from coronavirus is in the vicinity of the vaccine dose, thus adding greater mortality from heart attack, stroke, etc."

Dr Hervé Seligmann works at the Emerging Infectious and Tropical Diseases Research Unit, Faculty of Medicine, Aix-Marseille University, Marseille, France. He is of Israeli-Luxembourg nationality. He has a B. Sc. In Biology from the Hebrew University of Jerusalem, and has written over 100 scientific publications.

FranceSoir writes that they follow publications, data analyzes, and feedback from various countries on vaccination, and have therefore taken an interest in the *Nakim* article, asking to interview them in order to understand their analysis and its limitations.

The authors of the article declare they have no conflicts or interests other than having children in Israel.

After a presentation, the authors discussed their data analysis, the validations carried out, limitations, and above all, their conclusions that they compare with data received via a Health Ministry Freedom of Information Act request.

Their findings are:

- There is a mismatch between the data published by the authorities and the reality on the ground.
- They have three sources of information, besides the emails and adverse event reports they receive through the Internet. These three sources are Israeli news site *Ynet*, the Israeli Health Ministry database, and the U.S. federal Vaccine Adverse Event Reporting System (VAERS) database.
- In January 2021, there were 3,000 records of vaccine adverse events, including 2,900 for mRNA vaccines.
- Compared to other years, mortality is 40 times higher.
- On February 11, a *Ynet* article presented data related to vaccination. The authors of the *Nakim* article claim to have debunked this analysis based on data published by *Ynet* itself: "We took the data by looking at mortality during the vaccination period, which spans 5 weeks. By analyzing these data, we arrived at startling figures that attribute significant mortality to the vaccine."
- The authors say "vaccinations have caused more deaths than the coronavirus would have caused during the same period."
- Haim Yativ and Dr. Seligmann declare that for them, "this is a new Holocaust," in face of Israeli authority pressure to vaccinate citizens.

"Our reanalyses of these data explain why during the massive vaccination project initiated mid-December 2020 during a confinement, daily new confirmed COVID-19 cases failed to decrease as they do during confinements, and, more importantly, why numbers of serious, critical, and death cases increased during that period that covered at least one month. From mid-December to mid-February (two months), 2,337 among all Israeli 5,351 official COVID-deaths occurred. Our analyses indicate orders of magnitude increases in deaths rates during the 5-week long vaccination process, as compared to the unvaccinated and those after completing the vaccination process. Presumably, asymptomatic cases before vaccination, and those infected shortly after the 1st dose, tend to develop graver symptoms than those unvaccinated.

"The *Ynet* article is organized in an exciting way and uses data provided in an erroneous way by the Ministry of Health. It is unclear whether this was intentional to prove the vaccine's efficiency or if this was done erroneously because the provided data were misunderstood. Note that in Israel, all vaccines are from Pfizer.

"The data in the table, rather than indicating the vaccine efficacy, indicate the vaccine's adverse effects," the authors conclude.

Gibraltar is an interesting case study on safety

The colony had only 17 COVID deaths from March 2020 - Jan 9, 2021
Yet they had 53 deaths within 10 days of the vaccine rollout.

Expatica.com reported that the injections started on January 9th, and that by Sunday night January 10th, 5,847 doses had been administered.

Gibraltar began rolling out its vaccination programme on January 9 using the Pfizer vaccine and by Sunday night had administered 5,847 doses — covering around 17 percent of the population. ([Full Article.](#))

The [Government of Gibraltar](#) reported that as of January 10th, just one day after the injections started, 4 people immediately died:

53 dead in Gibraltar in 10 days after experimental Pfizer mRNA COVID injections started

Gibraltar is a British Colony at the southern tip of the Iberian Peninsula attached to the country of Spain. It's population is just over 30,000 people, and it is best known for its huge "rock," the "Rock of Gibraltar."

I have been contacted by residents in Gibraltar stating that 53 people have died in 10 days immediately following the roll out of injections of the Pfizer mRNA COVID injections, and calling it a "massacre."

Local media reports confirm the deaths, but blame them on COVID, and not the COVID injections.

However, prior to the roll out of the injections, it is reported that only 16 people in total died "from COVID" since the beginning of the "pandemic" about a year ago.

A Kevin Rushworth [reported](#):

Tiny Gibraltar Shines Huge Light on Vaccine Deaths

Ever since the epidemic began, sorting genuine Covid deaths from others has been a major issue. Now we have the added problem of vaccines in the mix. The UK now allegedly has the highest daily "Covid death" rate ever. Even higher than the "First Wave," in spite of the substantial degree of herd immunity that has inevitably accrued since the beginning. This atypical "Second Wave" coincides with the vaccine roll-out. Are the two connected?

Gibraltar, normally called simply "Gib," provides a very clear picture. This tiny British Colony, barely three miles long, appended to the South coast of Spain, has only 32,000 residents. It had suffered relatively little from the epidemic before the 9th January this year, with only seventeen deaths for the whole period. The death rate was well down the Deaths per Million League Table. This was not due to isolation, since Spanish workers have continued to pour into Gib every morning, and back out every evening.

'Young, healthy' South Mississippi man suffers stroke hours after receiving J&J vaccine

By Karen Abernathy | April 14, 2021 at 7:30 AM CDT - Updated April 14 at 5:09 PM

ST. MARTIN, Miss. (WLOX) - When the news broke about the pause of the Johnson & Johnson vaccine Tuesday, one Coast family was already living with a tragedy they believe was caused by the vaccine.

It started out as a normal day for 43-year-old Brad Malagarie of St. Martin. This busy father of seven spent the morning at his D'Iberville office before heading to get a Johnson & Johnson vaccine a little after noon.

He returned to work, and within three hours coworkers noticed he was unresponsive at his desk.

"They called me and said he had that vaccine and something is wrong, we think it's a stroke," said Celeste Foster O'Keefe, Malagarie's aunt.

Malagarie was rushed to the hospital and diagnosed with a stroke. A blood clot had lodged in his left middle cerebral artery. O'Keefe, who is also Brad's boss, said the family believes without a doubt that the vaccine caused the stroke.

"He can't talk now and he can't walk. He's paralyzed on the right side. He knows who we are and he will just cry when he sees us," O'Keefe said.

Las Vegas woman, 18, suffered seizures, clots in brain after J&J vaccine, family's pastor says

CAITLIN LILLY

UPDATED 16 HRS AGO | POSTED ON APR. 19, 2021

LAS VEGAS (FOX5) -- An 18-year-old Clark County woman suffered seizures and clotting in the brain after receiving the Johnson & Johnson COVID-19 vaccine on or about April 1, according to a GoFundMe campaign raising money for her medical expenses.

The woman, identified as Emma Burkey, was one of six women across the country who experienced a serious clotting side effect after receiving the one-shot vaccine.

spokesperson, Burkey was initially treated at St. Rose Hospital, Siena Campus in Henderson but was subsequently airlifted to Loma Linda Hospital's special neural treatment unit near San Bernardino, California.

"Emma was put into an induced coma, ventilated and at least three brain surgeries have been done to repair blood clots," the GoFundMe states.

Bethel Park woman paralyzed 12 hours after getting first dose of Pfizer vaccine, doctors searching for answers

April 19, 2021 at 6:44 pm EDT

BETHEL PARK, Pa. — There have been some negative side effects reported worldwide from the Pfizer, Moderna and Johnson & Johnson COVID-19 vaccines, but a Bethel Park woman told Channel 11 she has been affected by something that hadn't been seen at all yet: paralysis.

The 33-year-old woman, who asked to remain anonymous, said she felt fine in the hours after getting the first dose of the Pfizer vaccine last week. However, she said 12 hours later, she woke up in the middle of the night with no feeling in her arms or legs.

Paramedics came and rushed her to Jefferson Hospital. In the coming days, she was moved to Allegheny General Hospital in the Northside and then the Cleveland Clinic -- as doctors ran a multitude of tests to figure out how and why this happened. An MRI and spinal tap were clear, and her blood work all came back negative, ruling out any rare diseases or disorders.

"There is just nothing they can find wrong with me. No underlying conditions, I have nothing in my history and they are basically telling me, 'You're healthy and we can't figure out why this is going on,'" the woman told Channel 11.

Texas teen contracts GBS (known vaccine side effect) within weeks of shot

TEEN DIAGNOSED WITH GUILLAIN-BARRE SYNDROME
AFTER GETTING FIRST DOSE OF COVID-19 VACCINE

A Texas teenager diagnosed with Guillain-Barré syndrome (GBS) a few weeks after his first dose of the COVID-19 vaccine said he believes the vaccine is to blame, according to a local Houston news channel KPRC2 report.

A few weeks after receiving the vaccine, McGlaun became weak and had difficulty walking. He was admitted to CHI St. Luke's Health where he was diagnosed with GBS.

A few weeks after receiving the vaccine, McGlaun became weak and had difficulty walking. He was admitted to CHI St. Luke's Health where he was diagnosed with GBS.

One case of GBS was reported in a vaccinated participant in the J&J COVID vaccine clinical trial.

There's no known cure for GBS, but most people eventually

GBS is included as a possible risk for many vaccines including Adacel, Afluria, Engerix-B, Fluarix, Flulaval, FluMist, Fluzone, Gardasil/Gardasil 9, Havrix, Menactra, Menomune, MMR-II, PedvaxHIB, Pneumovax-23, ProQuad, Recombivax, Tenivac, Vaqta and Varivax.

Since 1992, the National Vaccine Injury Compensation Program has paid approximately \$500 million to 1,450 victims of post-vaccination GBS, The Defender reported.

Frontline worker unconscious, vented after shot reaction

FOX 4

Metro healthcare worker describes severe allergic reaction to COVID-19 vaccine

The Cass County healthcare worker got the Moderna shot in late December, blacked out and ended up on a ventilator. What happened to her is a cautionary tale, with important information everyone should know.

Chavonya Littlejohn has had a front row seat to the pandemic. She's a patient access team leader at Belton Regional Medical Center. Right after Christmas, she decided to take her shot at getting the Moderna COVID-19 vaccine.

She woke up more than 30 hours later hooked to a ventilator in unfamiliar surroundings. Littlejohn had been taken to Research Medical Center, where she remained for three days.

Right now, the COVID-19 vaccine under its emergency use is not eligible for standard vaccine injury relief through the courts.

This vibrant, 65-year-old retired nurse, suffered a thrombotic stroke 8 days after her second shot.

Her daughter has reported it to Pfizer but has yet to receive a response.

Almost all cases of disseminated intravascular coagulation (DIC) or cerebral venous thrombosis (CVT) after receiving the AstraZeneca vaccine were among women under age 55. Nine of these individuals died, according to the EMA statement.

Two different men both in critical condition both 36 hours after shot

February 14 at 2:20 PM · 🌐

My dad got vaccinated... 36 hours later he was in the hospital with heart failure. We thought we were going to lose him.

Me: Dr Cardiologist (DC), what's wrong with our dad?

DC: Well, at first he had all the symptoms of COVID, but he tested negative. Then we discovered he had heart failure.

Me: How bad was it?

DC: Your dad was very sick. We didn't think he would make it the first night.

Me: So what happened to his heart?

DC: Well, his arteries are clear and there's no blockage. So it's hard to say. We did find 2 liters of fluid we drained from his lungs that we think is secondary to the heart. And there's no infection.

Me: So what caused the heart failure and fluid in his lungs?

DC: We still don't know.

Me: Could it have been the experimental vaccine he received about 36 hours earlier...?

DC: Oh, no.

Me: Why not?

DC: There's no evidence for that.

Me: And you confirmed my dad doesn't have diabetes, metabolic syndrome or any other comorbidities, correct?

DC: Correct.

Me: So what caused him to have sudden heart failure? And what explains why he is now doing so much better?

DC: We still aren't sure.

Me: And you're sure it wasn't the vaccine?

DC: Yes.

Me: How can you be sure?

DC: It's just not.

What has to happen for something to be considered, even as an association (not causation) an adverse reaction in the reporting data?

I'm sensing things are likely not being recorded or documented accurately in the medical community.

I cared for a previously healthy patient yesterday who came in with a massive intraparenchymal hemorrhage about 36 hours after receiving his second dose of the Pfizer vaccine. Poor guy had complete left sided hemiparesis and total unilateral left sided neglect. He was vomiting secondary to the increased intracranial pressure and all he kept repeating was "I'm ok, I'm ok, I got the vaccine. I got both doses of the vaccine." Intubated, ventilated, emergency ventriculostomy, mannitol, anti-seizure meds. His prognosis is abysmal. Was it related to the vaccine? Don't you dare ask that question!!!

Wonder if he will show up in the VAERS database. I
Keep up what you do. You are one of the only islands of sanity in all this.

APR 7 - got shot —————> APR 7 - paralysis, seizures

Tabatha Lauren McDonald, 24-years-old hospital employee from Texas, had chest pains, paralysis and multiple seizures 2 hours after her J&J injection. In her Tik Tok video she shared she had never had a seizure prior.

Tabatha Lauren

22h · 🌐

I'm finally awake and able to get my thoughts together. I received my Johnson & Johnson vaccine yesterday, about a hour later (left) arm pain started then turned into Severe chest pain and shortness of breath, I was able to get to the ER whom performed test and EKGs that were abnormal, then I started seizing continuously... I was transported to Baylor Dallas with Stroke precautions, 102 fever and seizures. As of this morning I am aware of my surroundings, able to carry on a conversation.. so far I have seized 3 times.... I am getting my EEG this evening and hopefully we start to get some answers. Thank you to all that have reached out and prayed for me, makes such a difference.

APR 8 - got shot —————> APR 18 - Heart stopped / ICU

roadtripper00 Ready to see some homies!!! #vaxxed 🚫

Mandy Smith Long Term Recovery

\$34,985 raised of \$30,000 goal

roadtripper00 Please keep praying for my sweet Mandy. She is still in the ICU in critical condition. She is fighting and the doctors are doing everything they can for her. She has shown signs of improvement over the last 24 hours but we still have a long road ahead.

Meet Maddie, a 12-year-old who is participating in the children's trial.
She is now unable to walk, eat, drink or urinate.

JAN 20 - got 2nd shot —————> JAN 21 - first symptoms appear

Steph de Garay is with Patrick de Garay.

March 9 · 🌐

Please pray for Maddie, she has been having a long list of neurological and gastrointestinal issues from a rare adverse reaction she had to the second dose from the COVID vaccine trial she is in. Right now she is in the hospital because of a bowel obstruction that was cleared and also being unable to swallow liquids or solids. She hasn't been able to eat or drink without throwing up for over a week. Tomorrow she has an Upper GI scheduled that she will have to swallow 6oz of liquid which as of right now seems impossible. We need this for the doctors to understand how her muscles are reacting. If she is unable to eat soon she will have to have an NG tube placed which she did not do well with earlier this week. I believe in prayer, please pray she is able to swallow liquids tomorrow so that her body can get the nutrients it needs and so the doctors can begin to figure out why her body is reacting this way.

On top of this she has extreme pain in her back, neck, head and abdomen along with numbness in her legs and arm. She has an MRI of her head and spine scheduled on 3/16.

Please pray for her to heal so she can be the energetic 12 year old who loves hanging with friends and learning at school. I can't stand watching her wither away each day.

NOTE: she has not been unblinded but I am 99.99% confident she got the vaccine and not the placebo since everything started about 12 hours after she got the second dose on 1/20/21 and has gotten progressively worse since then.

Maddie's mother shared the following updates to her March 9 post

Circle of Mamas

12-Year-Old Suffers Severe Reaction in COVID Vaccine Clinical Trial

After seeing many specialists, MRIs, endoscopies, etc., Maddie finally got an actual diagnosis on March 12:

"So based on her physical symptoms and ruling out everything with all these tests, it's safe to say her diagnosis is Functional neurological disorder (FND). This is a medical condition where there is a problem with the functioning of the nervous system and how the brain and body sends and/or receives signals. We are thankful Maddie's team of doctors were able to give her a diagnosis with a name and a way to treat all of her symptoms. Most doctors do not even know about FND!

FND is usually triggered by something traumatic and most people have some pre-existing anxiety but not all do. It's no secret she has always been a type A personality, especially with grades (the apple doesn't fall far from the tree)!

Maddie's severe reaction to the second dose of the vaccine triggered it. We expected similar side effects to the flu shot. When she got her second dose not many people had even gotten their first dose so there wasn't the extensive list of symptoms that there is today. She was **one of the first people** in the study to have some of the symptoms she had which scared her and us. Then being told everything is normal time and time again when it clearly was not made her symptoms worse.

Her symptoms did continue and she was admitted to the hospital again. She is currently paralyzed from the waist down. April 11 update:

"Maddie was admitted to the hospital again on Friday. I'm not sure how long we will be here. She has significantly declined since she was discharged in March and is **unable to eat** without regurgitating her food. This caused her blood sugar to drop to 47 and she **lost about 15 pounds in a month**. Her blood sugar is stable and for now she has to be **fed through an NG tube** which she is having a hard time with. It was really bad for the first few hours and she threw up a bunch of stomach bile. She's been able to tolerate it a little better throughout the day and says it hurts her throat and she hates how she can feel the cold when they do her feeds or meds plus it makes her nauseous.

Maddie was also having **up to 20 blackouts/episodes a day** 3 weeks ago, they decreased after we weaned her off the lyrica but she did have 2 today in the hospital. She also has **tremors in her arms**, especially when she is in pain and **random verbal tics**.

A new symptom is **chronic urinary retention (can't empty bladder)**. They do an ultrasound of her bladder if she hasn't gone to the bathroom in 16+ hours or if she has severe pain in her lower abdomen. If it measures over 500ml of urine they have to use a straight catheter.

She still isn't able to walk and she can't feel from her lower hips down. She has no leg movement against gravity with her legs. This time we are on the Neurology floor so the team of doctors that do rounds in the morning are all in that group and pull the other doctors in. We have met with the nutritionist, PT/OT and Child Life. Physical Medicine & Rehabilitation will be here tomorrow. She is also seeing a Speech Therapist and they are doing a video swallow test or FEES study for her swallowing/regurgitating problems. Please pray that she is able to tolerate the NG tube better tomorrow and her urinary retention resolves itself. And please pray the team of doctors/nurses/therapists come up with a plan to help her eat and walk again. We hate watching her suffer and I wish I could take it away from her.

32 year-old-Canadian with NO allergies almost dies from allergic reaction to shot

P.E.I. woman hospitalized over 'extremely rare' COVID-19 vaccine allergy shares her story

Sara Fraser - CBC News - Posted: Apr 06, 2021 6:00 AM AT | Last Updated: April 6

Toni Lannigan, shown in an engagement photo with her fiancé, says she is having a serious allergic reaction to the Pfizer BioN-Tech vaccine. (Tracy Stewart)

Last week, Toni Lannigan's excitement over getting her COVID-19 vaccine turned into a panic.

The 32-year-old had no known allergies, but sometimes felt slightly unwell after annual flu shots, so staff at the King's County Memorial Hospital in Montague, P.E.I., flagged her to wait 30 minutes after her Pfizer-BioNTech shot instead of the usual 15, to make sure she would be all right.

It didn't take that long before she became very ill. The roof of her mouth itched, her tongue swelled and she became confused.

"I don't remember everything, but I remember looking around and seeing the nurses so concerned," she said.

Luckily, the emergency department was just steps away and staff rushed her there, where she said her heart began to race, her blood pressure dropped dramatically and she began having sharp pelvic pains.

She remembers being treated with epinephrine, a drug used to treat severe allergic reactions, and starting to shake uncontrollably. An ambulance took her to the Queen Elizabeth Hospital in Charlottetown, where she was admitted to intensive care.

Back home in rural Montague, she said the vision in one eye is still severely blurred — her doctor is keeping an eye on that — and she is weak, extremely nervous and jumpy. Her head aches, she has no appetite and she isn't sleeping well.

"Do I feel like myself? Absolutely not. I'm a very bubbly kind of girl — I don't feel that. I feel very nervous or on edge, and I don't know why," she said. "My nerves are shot."

Lannigan is glad her vaccine was administered at a hospital, not one of P.E.I.'s mass clinics. "Would I have made it to where I needed to be?" she wondered, if she had gotten the needle somewhere else.

"I couldn't really get any answers as to why that happened. And I still don't have any answers," Lannigan said. She would like to know what vaccine ingredient caused her reaction, and why.

'AstraZeneca vaccine left me with blood clots in my lung' - Stoke-on-Trent mum, 35, speaks out on jab

Beckie Wilson had her first dose of the Oxford-AstraZeneca vaccine on March 11 but doctors discovered blood clots in her lung less than three weeks later

A Stoke-on-Trent mum claims to have suffered blood clots in her lung after having the first dose of the Oxford-AstraZeneca vaccine.

Beckie Wilson had the jab on March 11 and says she soon started to experience symptoms such as shortness of breath.

The mum-of-two, from [Burslem](#), said: "I went and had the vaccine through work. I couldn't do much and I was getting out of breath just moving around.

"I went to the doctors about a week later and was put on a course of antibiotics, but when this had no affect they sent me for blood tests and a CT scan at Royal Stoke.

"The results from those came back last week and I received a phone call asking me to go in where the consultant was waiting for me.

"I rushed there and the consultant told me I have got quite a few blood clots in my right lung.

"It's a really dangerous situation to be in. You can die from these blood clots.

"The hospital has now put me on blood thinning tablets for three months to try to get rid of the clots and I've been told to stay off work. Without the blood thinning medication I'd probably be dead.

She says she has now been advised by her doctor not to have the second dose.

She said: "The hospital said the blood clots were caused by the vaccine.

"They explained that you can get blood clots through not moving around or through having an operation, but other than that the only other thing was the vaccine.

"The doctor has advised me not go for the second vaccine because it could lead to more blood clots.

"I've never had any issues with clots before."

Australia's health minister was in critical condition 1 day after shot

Health Minister in Critical Condition just one day after receiving Covid Vaccine

BY THE DAILY EXPOSE ON MARCH 9, 2021 • (22 COMMENTS)

Listen Now

Australia's Health Minister Greg Hunt has been admitted to hospital and is said to be in a serious condition just one day after receiving a dose of the Oxford / AstraZeneca Covid vaccine.

Federal Health Minister Greg Hunt was hospitalized for 4 days for cellulitis (which is a recorded side effect from the trials)

The Pineapple Express

6 m ·

BREAKING: HMAS Sydney is out of action due to approximately 80% of the ship company going down with severe illness straight after taking the COVID-19 vaccine. The exact same illness that Greg Hunt got after his vaccination.

It is believed eight members are currently in ICU and our thoughts and with them in these moments of uncertainty.

Will you trade potential facial paralysis for a 99.7% survival rate?

The coronavirus vaccine developed by Pfizer and BioNTech has apparently caused a number of side-effects not anticipated by the producers, a department manager at Sheba Medical Center in Tel HaShomer said Tuesday.

Professor Galia Rahav, chief of the Infectious Disease Unit and Laboratories at the Sheba Medical Center, spoke with Kan Reshet Bet Tuesday about the newly-discovered side-effects some people have reported experiencing after receiving the Pfizer-BioNTech vaccine.

The new side-effects range from paraesthesia – a nerve condition causing a tingling sensation or ‘pins and needles’ – to facial nerve paralysis.

“When we noticed this and spoke with [the company], they started to get reports about this,” said Rahav.

“At the beginning, they said that it was just hysterical women, but it doesn’t seem that way, because we’re seeing this with men as well.”

Our first warnings came from front line workers sharing their injuries on social media

This is what his wife, Jennifer, wants you to know about their experience...

"The last 8 days have been incredibly challenging. I had little interest in sharing the details of our lives publicly but through our experience it has become clear that information to help those suffering from the Covid Vaccine is minimal. Public groups to share experiences with the vaccine have been actively deleting posts describing my husband's experience as it doesn't follow the message they want you to hear.

"Before jumping in, I'd like clarify that my husband is a frontline worker in healthcare and has been serving his community in various ways for 10+ years. I'd also like

to say thank you to every single individual who has reached out to my husband and I to offer comfort and support. We appreciate you.

"On December 26th my husband received the Moderna Covid Vaccine. Shortly after, he developed a slight fever and general exhaustion. The following day came with incredible challenges that resulted in my husband being bed ridden. Whole body exhaustion, incredibly high fevers, chills, headaches, nausea. He could barely pick his arm up...

"Enter Monday, 12/28. On 1,000mg of Tylenol and 800mg of Motrin (ibuprofen) he was throwing temperatures higher than 104. I brought him to a local emergency room where he was told to treat his symptoms like Covid until proven otherwise... they gave him IV fluids and sent him on his way...

"While waiting for his ultimately negative results (he does not have Covid) I called numerous urgent care centers who refused to see him, on-call doctors for ECHN who refused to provide medical advice over the phone to an ECHN patient (isn't that their job?! Said doctor also informed me 104 fevers were not dangerous and the ice packs and cold cloths we were placing on his body were "only going to make me feel better and won't do anything for him".) We were left alone with minimal guidance from professionals in the field my husband has been working in for over a decade...

"You may be thinking, why didn't you call the vaccine hotline? We did. It was our first call. They picked up and said to report symptoms online for tracking purposes and then hung up. There was no guidance for treatment, no recommendations for who to seek help from... nothing more than "I hope you feel better".

"Fast forward a bit. Symptoms continued to worsen and I ultimately brought him to a privately held highly regarded emergency room in Hartford CT for further care. Without sharing specifics, I'll share that my husband was and continues to be so incredibly ill, the hospital has been testing every potential cause for his symptoms which has included 20+ tests and counting:

- Countless X-rays,
- Multiple Ultrasounds,
- Spinal taps for meningitis, and
- Regular ongoing blood work for blood bacteria, to name a few.

January 3 at 12:49 PM

UPDATE 1/8/2021

All - Over the last week, my husband and I have received hundreds if not thousands of messages, texts, calls and emails expressing empathy and sympathy for our living nightmare. Many of these reach outs came from family and friends. Many more came from tens of thousands of strangers simply passing along healing prayers and thoughtful words.

- Karl (my husband) and I are indeed REAL. Once we saw my initial post take off, we thought it best to lock down our personal accounts for privacy. Not that anything is truly private on social media.
- He and I are in our mid/late 20s and partake in active sports like walking, hiking, skiing and wake-boarding regularly.
- My husband has no underlying conditions, no chronic conditions, and
- Given his role as a first responder, my husband was regularly tested for COVID leading up to his vaccination and was tested numerous times after falling ill. My husband did not have and continues to be Covid free.
- Yes, it was officially determined that his illness was directly linked to the vaccine.

Our objective in sharing my husband's very real experience with Moderna, the healthcare system and "all of the things" was simple -> share so that others can make more informed decisions for themselves and their families.

We hope in some small way being open and sharing these personal details truly helped you form a more comprehensive understanding of the vaccine and its potential symptoms/risks.

After nearly 11 days of aggressive illness, 6 days and 5 nights in a privately held hospital without visitors, raging potential seizure inducing fevers, 35+ tests including regular blood draws, chest x-rays, liver ultrasounds, spinal taps, forced isolation, and a hospital bill I'm sure is five miles long....

Before I start this post I am in no way feeding into conspiracies, lies etc this is from true experience and i am currently having to write this with one hand. Today I went in for my pfizer covid 19 vaccination because i work in a care home and thought it would be in best interest of my residents to have it i was offered a choice! before i had the jab i was asked if i had any allergies which i stated a mild egg allergy so after my jab i was told to stay for a 30 minute observation to see if the vaccine caused a anaphylactic reaction. I was fine apart from a mild headache i put that down to not eating properly when i got home i decided to go for a nap which lasted an hour little did i know everything was going to get worse. When i woke up i could barely feel my right side (i was vaccinated in my right arm) and could barely string a sentence together i had slurred speech and little energy, as time went on i lost complete sensation in my right arm and leg and my headache became an excruciating pain in my neck aswell, my mum suspected something was wrong and called 111 for some advice as we weren't sure if these are normal side effects. When speaking to 111 they sent an ambulance which came in 10 minutes, i was assessed and sent to the royal hospital i was then sent for a CT scan and admitted as a potential stroke bearing in mind i am 19 years old. the CT scan was clear but there was no explanation for the loss of feeling in my body I am now on a stroke ward despite no sign of a stroke to monitor if my feeling comes back and to see if i can walk again.

Thank you all for the text, calls and messages!!!

6 hours later and my reaction is fading. Ive had IV meds to calm my system.. Ive went Afib, tachycardia (both confirmed by ekg), red, skin on fire, swollen eyes and felt plain miserable!!!

I should have listened to my first thought and passed on the vaccine.. for some its great for some its NOT! Dont let the media... people.. or anything talk you into something you have doubts on.. stick with your gut and go with it.... only you know your body!

As far as the 2nd one.. NOPE! Today has been horrible!

Just for note this was my first dose of the Pfizer vaccine.. I do have underlying medical conditions. POTs, MCAS, and Small fiber Neuropathy all a form of Dysautonomia.. but was told that the vaccine is better then Covid (which our house already had and recovered well from) .

My Pfizer Covid vaccine story....

I have waited to post my story out of fear of negative comments, therefore I'm asking you to please don't leave a negative comment because this is MY story. Thanks

I was excited to be chosen to receive the Pfizer Covid 19 vaccine, I have been a nurse for 20 years and love what I do for my community. I felt that everyone in my life, including my patients, family as well as myself would benefit if i receive the vaccine. After all what could be so bad about a vaccine? I believe vaccines are good, I'm healthy, No health conditions and No allergies.

On 12/18/20 around 12:30 pm, I go to the designated station pull up my right sleeve and receive the injection. I think "okay, that wasn't so bad" and I leave to go to the waiting area for 15 minutes to make sure no reactions occur.

As I was in the elevator going down, one floor, to the seating area, I felt some dizziness. I think to myself that I just stepped wrong in the elevator. I get to the floor and was greeted from a nurse that asked me to wait for a minute to be seated. I then felt a big wave of dizziness over my body. I asked if I could sit now as I was feeling really dizzy and my legs feel like noodles. The nurse kindly said yes, sit anywhere you'd like. I sat down and she asked how I was feeling? I said kinda dizzy and weird but I don't think it's anything. A sweet girl sitting across from me said to me, "it's not in your head, I feel the same thing." We looked at each other with a bewildered

I go to the back room and blood pressure showed 187/100 and pulse 120. I was asked by all personnel if I had HTN, allergies or allergies to the flu vaccine. I said No I don't have any allergie or HTN. The fullness in my throat quickly escalated to feeling like I was being choked with extreme heat inside my body that started at my throat and waved down to my abdomen and back up. That's when I got an IV, Benadryl, solumedrol and my first injection of epinephrine. Now my blood pressure and heart rate was even higher and I start shaking uncontrollably due to the epi. I stare at the ceiling and I feel this is surreal and not me, I still don't quite realize what's happening until the medical person standing on my left side asks the physician on my right, she's having an anaphylactic reaction, isn't she? The physician on my left says, "yes, she is." The physician says to me your O2 sats are good, therefore you are breathing, so try not to be scared and keep talking to me. He holds my hand, telling me not to worry that he's got this and I'm going to be fine. He then says your voice sounds raspy. Can you try to talk louder? I could not talk any louder. As my fingertips turn blue, tears start coming down from my eyes, and my symptoms get worse. I began feeling like I was drowning. I tell him, it's getting worse and i feel like I'm drowning! That's when I got the second epinephrine injection. My body continued to shaking but even worse. Then Finally, but slowly, the strangulation halted and my symptoms started getting better. It was going away! I could breath a little better now and my voice starts getting stronger. Once I was out of danger, I realized I had been there for an hour, as I was wheeled to a hospital bed to wait for my body to regain normalcy again.

It was 8 pm when I finally left the hospital. The other girl that had the anaphylactic reaction like me went to ICU so I felt lucky to be going home, I

Uncontrollable, full body tremors are now a known side-effect

Moderna

...

If you are considering the vaccine for covid..... the MODERNA.... I would advise against it! I'm in bad shape! Everyday getting worse and I'm not getting help or answers! I'm scared to death to say the least! And to find someone willing to attempt to figure this out hasn't been very successful! I went to 2 hospitals today, walked out of deaconess and went to St Vincent. No answers there either. They say let's see a neurologist(who knows when they can see me) yesterday my tongue began to spasm and it hasn't quit. Today my whole body has been convulsing all day! They sent me home!! I'm posting 2 videos that are quite embarrassing if you know me but I want you to see what's happening to me! Just please pray for me

BAKERSVILLE, NORTH CAROLINA — Ms. Kristi Simmonds has been a registered nurse since 2007. Her hard work and dedication to the profession led to a clinic manager position at Kindred at Home Care Services in October. Ms. Simmonds wanted to lead by example. She received the Moderna mRNA shot on January 19, according to her Facebook page. The goal was to protect her patients and co-workers, while also demonstrating that the shots are safe. She is now warning people to exercise due diligence before getting the jab.

Ms. Simmonds throat and tongue swelled up so much that she could barely breath. She went to the hospital on January 21. Doctors prescribed her Benadryl and sent her home. Ms. Simmonds rested for four days and returned to work, thinking the worst was over. Her whole world changed that night when she got home. Ms. Simmonds started having uncontrollable convulsions and muscle spasms.

32-Year-Old Mexican Doctor Suffers Seizures and is Paralyzed After Receiving the Pfizer Experimental Vaccine

Dr. Karla Cecilia Pérez Osorio (right).

The [Mexican Press](#) is reporting that a 32-year-old female doctor in Coahuila has suffered seizures and become paralyzed after receiving the Pfizer experimental COVID mRNA vaccine on December 30, 2020.

Dr. Karla Cecilia Pérez Osorio reportedly was working as an internist at the General Hospital of Zone No. 7, in the municipality of Monclova. She was subsequently transferred to the High Specialty Medical Unit No. 25 of the IMSS, in Monterrey, Nuevo León.

She was reportedly evaluated by a neurologist and diagnosed with transverse myelitis, a known side effect of vaccines, and specifically of the COVID experimental mRNA vaccines as this injury was observed in some of the vaccine trials of the various COVID19 experimental trials being conducted around the world.

Hamilton PSW says allergic reaction to COVID-19 vaccine led to fainting, seizures and CPR

Bobby Hristova · CBC News · Posted: Dec 30, 2020 11:56 AM ET | Last Updated: December 30, 2020

Deborah Tilli, 27, says she accepted the possibility of death while suffering a severe allergic reaction after receiving the COVID-19 vaccine. She says she feared her two daughters, ages seven and four, would be left without a mother. (Submitted by Deborah Tilli)

Tilli says the paramedic checked her vitals and noticed her heart rate was high. She received a Benadryl shot and it seemed to work for a few minutes. But the symptoms returned and worsened, she says. "The supervisor from the paramedics was there and he just said 'OK, let's give her the EpiPen,'" Tilli said.

"Within a minute, I just said, 'Something doesn't feel right in my body,' and I remember just passing out and leaning over to the right."

Dave Thompson, superintendent of the local paramedic service, confirmed to CBC News that Tilli was taken to hospital in stable condition.

Tilli says when she woke up, she was told she suffered seizures and needed CPR for a brief period. She doesn't remember much during the reaction, but says one moment sticks out — accepting the fact that she could die.

"There was a moment where, I don't want to say I gave up, but I was just like 'It is what it is.' ... [Days later] when I was in bed the other night, I was thinking, 'What if I left my two girls without a mother?'" Tilli said.

Greek doctor & nurse paralyzed same day as vaccination

Greek Hospital Administrator Faces Criminal Prosecution for Reporting Nurse's Paralysis after Second mRNA Shot

CORFU, GREECE – A Greek nurse is now paralyzed after receiving a second dose of mRNA. The 40-year-old nurse is a mother of two and has been a nurse for 17 years.

The nurse, whose name has not been disclosed, developed a fever, followed by excruciating pain throughout her body immediately after the second shot. She was rushed to the hospital when she was unable to move or feel her lower extremities.

Michalis Giannakos, President of the Panhellenic Federation of Public Hospital Workers (POEDIN), told [Open TV](#) in the East Attica region that X-rays came back clean. The nurse is now undergoing neurological assessments.

Giannakos said the nurse "was in perfect health" prior to receiving the second mRNA shot. It is believed that the nurse developed [Guillain-Barre syndrome](#).

The Prosecution of the Court of First Instance is considering pressing criminal charges against Giannakos. Greek media outlet *Ethnos* is reporting that a prosecutor is investigating if Giannakos committed the crime of "[spreading fake news](#)."

His crime is expressing an mRNA adverse effect with "too much certainty."

THE JERUSALEM POST

19-year-old hospitalized in ICU days after receiving second Pfizer vaccine

By MAAYAN JAFFE-HOFFMAN FEBRUARY 1, 2021 22:01

A 19-year-old was hospitalized with myocarditis – inflammation of the heart muscle – five days after receiving his second dose of the coronavirus vaccine, Terem emergency medical clinic reported Monday.

According to the clinic, it has still not been confirmed that the inflammation was developed as a side effect of the vaccination. However, a number of COVID-19-related myocarditis cases have been reported, according to the US National Institutes of Health.

From when he had received the second dose, he had experienced an

Terem took blood tests that revealed the heart inflammation. were radiating down his left arm, according to Terem's Dr. Badarnih Bahaa.

Without treatment, myocarditis can lead to cardiac arrhythmia and even death.

The 19-year-old had no underlying medical conditions prior to the event.

I'm a 21 year old CNA at a nurs home i was working and completely healthy i got told to go get the vaccine (from peer pressure bc i didn't want it) talk to a lady told her i had seizures in the past i had a cold and have allergies to shellfish amoxicillin and penicillin (SHE CROSSED THEM OFF AND PUT N/A! ON MY CONECENT FORM!) I took the vaccine at the 12:02 on Jan 8 i walk around and made my way to my seat and immediately felt my heart racing getting hot and dizzy i tried everything to calm my heart down and nothing worked i put a cold water bottle on my head and watched my Apple Watch to see how high my heart rate was it was 176 when i checked that's when i new something was wrong i stood up to get help and i just collapsed. I couldn't move after my hands and legs seemed paralyzed my left side of my face was all pins and needles feeling. They say i had two seizure like eps i was throwing up and screaming in pain. I then had two epi pens in the left leg i couldn't feel it at all Bc my legs couldn't feel anything my legs where completely numb and well paralyzed the emts came i was extremely tired and weak and hurt ER i noticed that my feet where purple we tried to plop them up they would change in color back to normal but still freezing cold and would turn purple right when i put them down. It's come to the point of painful and pins and needles feeling is worse it's been worse on the left then the right the whole time i can't walk without support and my walker and it's very painful. I went to Boston hospital to get my feet checked out since they are purple and now i need to get a biopsy done to my feet. I reported it to Pfizer and they will be calling my in the next few days i was told

Some of these vaccine injuries will be life-long and devastating

Hadassah Hospital:

Young man develops 'rare life-threatening syndrome' after Covid-19 vaccine

23 year old sent to Hadassah Hospital found to have developed rare multisystem inflammatory syndrome 24 hours after getting Covid vaccine.

Tags: Vaccine

Arutz Sheva Staff , Jan 10 , 2021 11:44 AM

24 hours after receiving the Covid-19 vaccine, a 23-year-old man developed a rare multisystem inflammatory syndrome, which causes, among other things, severe damage to heart function.

Prof. Dror Mevorach, director of the coronavirus department at Hadassah, tweeted on the matter, writing, "Rare life-threatening multi-system inflammatory syndrome (MIS) following BNT162b2 mRNA covid-19 vaccination in a 23 y old social worker was identified at our Department of Medicine B at Hadassah Medical Center, Jerusalem, Israel and reported to MOH and WHO."

Coronavirus vaccines sending hundreds to ER, according to US gov't reporting system

Seventeen people have had a 'life threatening' reaction to the COVID-19 shot. Two reactions were so bad they led to a 'permanent disability.'

"The system has received reports of 1,156 total adverse events. Of those, 17 have been 'life threatening' and two have led to a 'permanent disability.'"

Thousands of others are self-reporting an inability to return immediately to work or perform normal daily activities after the vaccine. According to *The Epoch Times*, these incidents were reported through V-safe, "a smartphone

Peruvian Man Suffers Guillain-Barré-like Symptoms After Receiving Sinopharm COVID-19 Vaccine

by Marco Cáceres

Published December 21, 2020 | Vaccination, Risk & Failure Reports

"Several days ago we signaled, as we are required, to the regulatory authorities that one of our participants (in trials) presented neurological symptoms which could correspond to a condition called Guillain-Barre syndrome," said German Malaga, MD, chief researcher at Cayetano Heredia University in Lima, Peru, where the vaccine trial is being conducted. "We are concerned about the situation, and we are providing all of our help and support to ensure that it is cleared up," he said.¹

PUBLIC HEALTH INFORMATION

Hundreds Sent to Emergency Room After Getting COVID-19 Vaccines

BY ZACHARY STIEBER | January 5, 2021 Updated: January 5, 2021

Thousands of people self-reported being unable to work or perform daily activities, or required care from a health care professional, after getting one of the doses from the first tranche.

The FDA's Adverse Event Reporting System hasn't been updated to include data for the last quarter of 2020 yet.

As of April 22, there are now 446 reports of Tinnitus post-vaccination in the VAERS database (U.S. only records)

Since this is a known side effect from the trials, were recipients warned about this potential injury?

Tinnitus reports grow amid COVID-19 vaccinations

By Brian Buntz | March 11, 2021

A handful of patients in Johnson & Johnson's Phase 3 COVID-19 clinical trial complained of tinnitus, or ringing in the ears.

After reporting on the subject, we've received a steady stream of reports from Moderna and Pfizer-BioNTech vaccine recipients who experienced tinnitus.

The U.S. Vaccine Adverse Event Reporting System (VAERS) database cites 152 reports of tinnitus among 25,072 COVID-19 recipients of vaccines from Pfizer-BioNTech and Moderna. The database also has 11 reports of sudden hearing loss and 39 reports of hyposacusis (loss of hearing acuity).

A U.K. database cataloging adverse events related to AstraZeneca and Pfizer-BioNTech vaccines also lists a number of cases of tinnitus. In a summary of adverse reaction reports for the 54,180 recipients of the AstraZeneca vaccine from Jan. 1 to Feb. 28, there were 320 tinnitus reports. For the Pfizer-BioNTech vaccine, there were 196 tinnitus reports among 33,207 recipients in the same time frame.

Herpes infection possibly linked to COVID-19 vaccine, study says

By Jackie Salo

April 20, 2021 | 9:29am | Updated

Herpes infections may be a side effect of a COVID-19 vaccine, experts have revealed.

Scientists in Israel identified six cases in a new study of patients developing a skin rash known as herpes zoster — or shingles — after receiving the Pfizer vaccine, according to a study in the *Rheumatology journal*.

Herpes zoster starts off as a small, itchy skin rash, but if left untreated, it could cause nerve damage and pain, the Jerusalem Post reported.

Out of 491 patients, six people or 1.2 percent experienced the infection, researchers said.

RHEUMATOLOGY British Society for Rheumatology

Herpes zoster following BNT162b2 mRNA Covid-19 vaccination in patients with autoimmune inflammatory rheumatic diseases: a case series FREE

Published: 12 April 2021

The prevalence of HZ was 1.2% ($n = 6$) in patients with AIIRD compared with none in controls. Six female patients aged 49 ± 11 years with stable AIIRD: rheumatoid arthritis ($n = 4$), Sjogren's syndrome ($n = 1$), and undifferentiated connective tissue disease ($n = 1$), developed the first in a lifetime event of HZ within a short time after the first vaccine dose in 5 cases and after the second vaccine dose in one case. In the majority of cases, HZ infection was mild, except a case of HZ ophthalmicus, without corneal involvement, in RA patient treated with tofacitinib. There were no cases of disseminated HZ disease or postherpetic neuralgia. All but one patient received antiviral treatment with a resolution of HZ-related symptoms up to 6 weeks. Five patients completed the second vaccine dose without other adverse effects.

Conclusion

Epidemiologic studies on the safety of the mRNA-based COVID-19 vaccines in patients with AIIRD are needed to clarify the association between the BNT162b2 mRNA vaccination and reactivation of zoster.

MEDPAGE TODAY*

New Side Effect From mRNA COVID Vaccines?

— Surprise finding in Israeli case series

by Nancy Walsh, Contributing Writer, MedPage Today
April 15, 2021

At two centers in Israel, there have been six cases of herpes zoster developing shortly after administration of the Pfizer vaccine in patients with disorders such as rheumatoid arthritis since December 2020, according to Victoria Furer, MD, of Tel Aviv University, and colleagues.

Little has been known about the safety and efficacy of the COVID-19 vaccines among patients with rheumatic diseases, because immunosuppressed individuals were not included in the initial clinical trials, they explained.

Mother's legs erupt in blisters 'after getting AstraZeneca's jab'

Luke Andrews Health Reporter For Mailonline 10 hrs ago

A mother has claimed her legs erupted into painful blood-filled blisters that 'merged together' after receiving AstraZeneca's coronavirus vaccine.

Sarah Beuckmann, from Glasgow, said she suffered flu-like symptoms after getting her first dose in mid-March — a very common side-effect. But the 34-year-old began to feel a tingling sensation in her legs just a week later and noticed a rash flaring up around her ankles.

She called the GP to arrange an appointment that morning, but by the afternoon her skin was already breaking out into blisters.

The mother-of-one was rushed to Queen Elizabeth University Hospital, and claimed at one point she feared her legs might have to be amputated.

Ms Beuckmann spent 16 days in hospital, with blisters also appearing on her hands, face, arms and bottom. She was discharged to recover at home but is

wheelchair-bound because she struggles to walk due to the bandages on her legs and blisters on the soles of her feet.

Man's skin 'peeled off' in rare reaction to Johnson & Johnson COVID vaccine

By Jackie Salo

March 30, 2021 | 3:32pm | Updated

A Virginia man suffered a rare reaction to a COVID-19 vaccine that caused a painful rash to spread across his entire body and skin to peel off, doctors said.

Richard Terrell, 74, of Goochland began suffering strange symptoms four days after receiving the one-dose Johnson & Johnson vaccine, [news station WRIC reported](#).

"I began to feel a little discomfort in my armpit and then a few days later I began to get an itchy rash, and then after that I began to swell and my skin turned red," Terrell told the outlet.

But soon the rash covered his entire body, Terre said.

"It all just happened so fast. My skin peeled off," Terrell told the outlet.

"It was stinging, burning and itching. Whenever I bent my arms or legs, like the inside of my knee, it was very painful where the skin was swollen and was rubbing against itself," he continued.

He went to the emergency room at the hospital, where doctors determined that he had experienced an adverse reaction to the vaccine, WRIC reported.

"We ruled out all the viral infections, we ruled out COVID-19 itself, we made sure that his kidneys and liver was okay, and finally we came to the conclusion that it was the vaccine that he had received that was the cause," Dr. Fnu Nutan told the outlet.

She said that the medical episode could have been life-threatening if left untreated.

VAERS is a passive surveillance system in the U.S. which captures adverse events following vaccination.

'Events' are reported by hospital staff, nursing home staff, doctors, etc.

This data is searchable at: <https://wonder.cdc.gov/vaers.html>

It is a federal crime to file a false VAERS report.

Each VAERS case is assigned a unique ID number and has a description of the incident (death, disability, etc.)

Adverse Event Description

Cardiac arrest within 1 hour Patient had the second vaccine approximately 2 pm on Tuesday Jan 12th He works at the extended care community and was in good health that morning with no complaints. He waited 10-15 minutes at the vaccine admin site and then told them he felt fine and was ready to get back to work. He then was found unresponsive at 3 pm within an hour of the 2nd vaccine. EMS called immediately worked on him 30 minutes in field then 30 minutes at ER was able to put him on life support yet deemed Brain dead 1-14-21 and pronounced dead an hour or so later

Listed on the following pages are only 70 of the 3,000+ deaths recorded in VAERS.

Anyone can view the database via the following steps:

<https://wonder.cdc.gov/vaers.html>

1. Accept the disclaimer at bottom of page
2. Click on VAERS data search
3. In section 1, click on group results by "VAERS ID", and by "vaccine type" and by "event category"
4. Under optional measures (still in section 1) tick off "adverse event description"
5. Scroll down to section 3 and under Vaccine Products select "Covid19 vaccine" Make sure it is the only option selected. (You will have to deselect "All vaccine products" from the top of the list.)
6. Scroll down to section 5 and under event category select "death". Make sure it is the only option selected. (Don't forget to deselect "all events" from the top of the list).

Scroll to the very bottom and click send.

VAERS ID # 938118-1 AGE 51. FEMALE Vaccinated 1/5/2021. Died. 1/10/2021. Pfizer vaccine. On 1/8/2021 17:30 patient taken to ER, cerebellar hemorrhage, stroke, aneurysm.

VAERS ID # 946293-1 AGE 51. MALE Vaccinated 1/7/2021. Moderna . Became increasingly hypoxic around 1800hours on 1/7/2021. Transported to ER for acute on chronic hypoxia respiratory failure. Expired on 1/12/2021@2325 at med center.

VAERS ID # 918518-1 AGE 50. FEMALE Vaccinated 12/31/2020. Died 12/31/2020. Moderna

VAERS ID # 930910-1 AGE 52. FEMALE Vaccinated 1/8/2021. Died 1/8/2021. Patient received COVID vaccination 12:15pm. Patient was monitored for the appropriate amount of time by nursing staff. Patient passed away at 2:15pm. Moderna

VAERS ID # 933739-1 AGE 54. FEMALE. Vaccinated 1/8/2021. Died 1/10/2021. 2 days later. Staff member checked on her at 3am and patient stated that she felt like she couldn't breathe. 911 was called and taken to the hospital. While in the ambulance, patient coded. Two EEGs were given to determine that patient had no brain activity. Pfizer

VAERS ID # 923219-1 AGE 41. FEMALE Vaccinated 12/30/2021. Died. 1/1/2021. Pfizer vaccine. The patient did not experience any adverse event at the moment of inoculation with COVID-19 vaccine or the following days. On January 1, 2021, at lunch time, two days after receiving the vaccine, the patient was found unresponsive in her bed by her partner.

VAERS ID # 936805-1 AGE 25. MALE Vaccinated 12/22/2020. Found unresponsive and expired at home on 1/11. Moderna

VAERS ID # 943397-1 AGE 28. MALE Vaccinated 12/23/2020. Died 1/14/2021. Patient was found unresponsive at work in the hospital. Patient pupils were fixed and dilated. Pfizer

VAERS ID # 939050-1 AGE 32. FEMALE Vaccinated 12/28/2020. Died on 1/4/21 at 7:20am. Moderna

VAERS ID # 921667-1 AGE 39. FEMALE Vaccinated 12/29/2020. It was reported that the staff member deceased somewhere between 1/3/2021 and 1/4/2021. Pfizer

VAERS ID # 933578-1 AGE 43. MALE Vaccinated 1/8/2021. Died 1/9/2021. Moderna

VAERS ID # 937527-1 AGE 44. FEMALE Vaccinated 12/23/2020. Died on 1/4/2021. Pfizer

VAERS ID # 929764-1 AGE 45. MALE Vaccinated 12/28/2020. Died 12/29/2020. The patient was found deceased at home about 24 hours after immunization. Moderna

VAERS ID # 934968-1 AGE 54. MALE Vaccinated 1/4/2021. Died 1/6/2021. Pfizer. The patient received the vaccine on 04Jan2021, after which he started not feeling well. He went right home and went to bed. He woke up and ate a bit but not much and then was kind of pale. The patient then started to vomit, which continued throughout the night. He was having trouble in breathing. Emergency services were called, and they took his vitals and said that everything was okay, but he was very agitated; reported as not like this prior to the vaccine. The patient was taken to urgent care where they gave him an unspecified steroid shot and unspecified medication for vomiting. The patient continued to vomit throughout the day and then he was very agitated again and would fall asleep for may be 15-20 minutes. When the patient woke up, he was very restless (reported as: his body was just amped up and could not calm down). The patient calmed down just a little bit in the evening. When the patient was awoken at 6:00 AM in the morning, he was still agitated. The patient stated that he couldn't breathe, and his mind was racing. The patient's other brother went to him and he was not responsive, passed on 06Jan2021 around 10:15 AM. It was reported that none of the symptoms occurred until the patient received the vaccine.

VAERS ID # 942106-1 AGE 54. MALE Vaccinated 1/8/2021. Died 1/9/2021. Pfizer vaccine. On scene, the patient had a witnessed arrest with EMS starting CPR. He was given 3 rounds of epi without ROSC. Patient's wife, had noted patient had received covid vaccine the prior day.

VAERS ID: 924456-1, AGE 85 vaccination was administered at approx. 10:00 AM and the patient continued throughout day without any complaints or signs of adverse reaction. When the nursing staff went to the room to check on the resident patient was found unresponsive, no chest rises, noted regurgitated small amount of food to mouth left side.

VAERS ID # 996156-1 AGE 58. FEMALE Vaccinated on 02/02/2021. Moderna. Observed by vaccination team for a period of time. She reported shoulder pain radiating into shoulder blade in arm vaccine was received. Vaccination team offered ice pack to her and released back to work. 10pm that evening, she sent text to coworker that her pain was ""off the charts"" and that she had pain covering her whole left side of her body. She did not come to work in the morning and did not contact work. Well being check was performed at approximately 9am on 2/2/2021 and she was found dead in her home.

VAERS ID # 935511-1 AGE 56. FEMALE Vaccinated 1/8/2021. Died 1/9/2021. Moderna. Patient received the 1st dose of Moderna and was found deceased in her home the next day.

VAERS ID # 941811-1 AGE 56. FEMALE Vaccinated 1/4/2021. Died 1/11/2021. Moderna. Resident began having fever on 1/11/21. Resident sent to nearest ER for evaluation. Later in the evening the staff AT Medical Center called to inform staff that resident had expired @ 2230 as a result of Respiratory Failure and Sepsis.

VAERS ID # 944595-1 AGE 56. MALE Vaccinated 1/12/2021. Died 1/14/2021. Pfizer. Cardiac arrest within 1 hour Patient had the second vaccine approximately 2 pm on Tuesday Jan 12th He works at the extended care community and was in good health that morning with no complaints. He waited 10-15 minutes at the vaccine admin site and then told them he felt fine and was ready to get back to work. He then was found unresponsive at 3 pm within an hour of the 2nd vaccine. EMS called immediately worked on him 30 minutes in field then 30 minutes at ER was able to put him on life support yet deemed Brain dead on 1-14-21 and pronounced dead an hour or so later.

VAERS ID # 921768-1 AGE 58. FEMALE Vaccinated 1/4/2021. Died 1/4/2021. Pfizer.

VAERS ID # 930154-1 AGE 60. MALE Vaccinated 1/5/2021. Died 1/8/2021. Moderna.

VAERS ID # 933090-1 AGE 60. MALE Vaccinated 1/5/2021. Died. 1/9/2021. Pfizer.

VAERS ID # 941743-1 AGE 60. FEMALE Vaccinated 1/12/2021. Died 1/13/2021. Moderna. Found deceased at 3am

VAERS ID # 932898-1 AGE 61. MALE Vaccinated 12/17/2020. Died. 12/30/2020. Pfizer vaccine. The patient had an apparent cardiac arrest on 12/23/20 and was admitted to the ICU. He was taken off of life support on 12/30/20.

VAERS ID # 942085-1 AGE 62. FEMALE Vaccinated 1/2/2021. Died 1/8/2021. Pfizer. On 1/8/21 at 0615 resident was shaking. Reported all over pain. At 0850 she was not responsive.

VAERS ID # 940955-1 AGE 66. FEMALE. Vaccinated 1/11/2021. Died 1/11/2021. Pfizer. Cardiac Arrest. Patient was found pulseless and breathless 20 minutes following the vaccine administration. Received the second dose of BNT162B2. Took the first dose on 21Dec2020. MD found no signs of anaphylaxis.

VAERS ID: 926600-1, 65yo Patient did not report any signs or symptoms of adverse reaction to vaccine. Patient reported not feeling well and passed away that day.

VAERS ID: 925154-1, 84yo DEATH within 1 day, no current illness.

VAERS ID: 926797-1, 93yo had a vaccination on 12/31/2020 late morning passed away early morning 01/01/2020.

VAERS ID: 927189-1, 74yo Patient was vaccinated at 11am and was found at the facility in his room deceased at approximately 3:00pm. Nurse did not have cause of death

VAERS ID: 927260-1, 87yo No adverse effects noted after vaccination. Patient found unresponsive at 16:45 on 1/6/21. Abnormal breathing patterns, eyes partially closed SPO2 was 41%, pulseless with no cardiac sounds upon auscultation. CPR, pulse regained, patient breathing. Patient sent to ER had multiple cardiac arrest and severe bradycardia and passed.

VAERS ID: 924664-1, 92yo No current illness. At 1855, I was alerted by caregiver, resident was not responding. Per caregiver, she was doing rounds and found resident in bed, unresponsive, mouth open, observed gurgling noises. Primary caregiver observed resident at baseline and ambulating after dinner at approximately, 1800 less than an hour prior to incident. Resident received the first dose of vaccine on 1/2. Expired at 0615 per Castle RN.

VAERS ID: 923993-1, 62yo Patient was vaccinated Dec 30, 2020. Prime dose of Moderna vaccine. Observed for full 15 minutes post-injection. No complaints when asked during observation. Released. Subsequently, vaccine clinic staff learned from the patient's supervisor that patient had expired on Jan 2, 2021 at his home.

VAERS ID: 909095-1, 66yo on 12/24/2020 the resident was sleepy and stayed in bed most of the shift. He stated he was doing okay but requested pain medication for his legs at 250PM. At 255AM on 12/25/2020 the resident was observed in bed lying still, pale, eyes half open and foam coming from mouth and unresponsive. He was not breathing and with no pulse.

VAERS ID: 924464-1, 61yo coughing up blood, significant hemoptysis -- > cardiac arrest. started day after vaccine

VAERS ID: 921768-1, 58yo Vaccine received at about 0900 on 01/04/2021 at her place of work, Medical Center, where she was employed as a housekeeper. About one hour after receiving the vaccine she experienced a hot flash, nausea, and feeling like she was going to pass out after she had bent down. Later at about 1500 hours she appeared tired and lethargic, then a short time later, at about 1600 hours, upon arrival to a friends home she complained of feeling hot and having difficulty breathing. She collapsed, when medics arrived, she was still breathing slowly then went into cardiac arrest and was unable to be revived.

VAERS ID: 910363-1, 84yo Patient had mild hypotension, decreased oral intake, somnolence starting 3 days after vaccination and death 5 days after administration.

VAERS ID: 913143-1, 84yo Vaccine administered with no immediate adverse reaction at 11:29am. Vaccine screening questions were completed and resident was not feeling sick and temperature was 98F. At approximately 1:30pm the resident passed away.

VAERS ID: 913733-1, 85yo My grandmother died a few hours after receiving the moderna covid vaccine booster 1. The treating hospital did not acknowledge this and I wanted to be sure a report was made.

VAERS ID: 914604-1, 74yo Spouse awoke 12/20 and found spouse dead. Client was not transferred to hospital.

VAERS ID: 914690-1, 83yo Within 24 hours of receiving the vaccine, fever and respiratory distress, and anxiety developed requiring oxygen, morphine and ativan. My Mom passed away on the evening of 12/26/2020.

VAERS ID: 914805-1, 63yo RESIDENT CODED AND EXPIRED

VAERS ID: 914895-1, 78yo Injection given on 12/28/20 - no adverse events and no issues yesterday; Death today, 12/30/20,

VAERS ID: 914917-1, 63yo Death by massive heart attack. Pfizer-BioNTech COVID-19 Vaccine EUA

VAERS ID: 914961-1, 88yo pt passed away with an hour to hour and 1/2 of receiving vaccine.

VAERS ID: 914994-1, 90yo pt was a nursing home pt. pt received first dose of covid vaccine. pt was monitored for 15 minutes after getting shot. staff reported that pt was 15 days post covid. Pt passed away with in 90 minutes of getting vaccine.

VAERS ID: 915562-1, 88yo pt received vaccine at covid clinic on 12/30 at approximately 3:30, pt vomited 4 minutes after receiving shot--dark brown vomit, Per staff report pt became short of breath between 6 and 7 pm that night. Pt passed away at approximately 10pm.

VAERS ID: 915682-1, 85yo Resident received vaccine per pharmacy at the facility at 5 pm. Approximately 6:45 resident found unresponsive and EMS contacted. Upon EMS arrival at facility, resident went into cardiac arrest, code initiated by EMS and transported to hospital. Resident expired at hospital at approximately 8 pm

VAERS ID: 915920-1, 96yo Resident was living in an assisted living facility. She fell on 11/24/2020 and was admitted to this facility for rehab. Received vaccine 12/28/2020 in am and expired that afternoon.

VAERS ID: 918065-1, 64yo Vaccine 12/30/2020. 1/1/2020: Pronounced deceased 1/1/2020

VAERS ID: 918388-1, 65yo Vaccine 12/30/2020. 1/1/2020: Resident found unresponsive without pulse, respirations at 04:30 CPR performed, expired at 04:52 by Rescue, No acute illness at time of vaccination.

VAERS ID: 918418-1, 65yo Vaccine 12/30/2020. 1/1/2020: Resident became SOB, congested and hypoxic requiring oxygen, respiratory treatments and suctioning. Stabilized after treatment and for the next 72 hours with oxygen saturations in the 90s. On 1/3/2021 was found without pulse and respirations.

VAERS ID: 918487-1, 94yo Two days post vaccine patient went into cardiac arrest and passed away.

VAERS ID: 915880-1, 99yo Patient died within 12 hours of receiving the vaccine.

VAERS ID: 918518-1, 50yo syncopal episode - arrested - CPR - death

VAERS ID: 919108-1, 100yo Fever, Malaise, passed the day after vaccine.

VAERS ID: 919537-1, 96yo Resident exhibited no adverse events during 30 minute monitoring following vaccine administration. Resident found without pulse at 1900.

VAERS ID: 920326-1, 89yo Redness and warmth with edema to right side of neck and under chin. Resident expired on 1.1.21.

VAERS ID: 920545-1, 93yo "The resident received is vaccine around 11:00 am and tolerated it without any difficulty or immediate adverse effects. He was at therapy from 12:36 pm until 1:22 pm when he stated he was too tired and could not do anymore. The therapist took him back to his room at that time and he got into bed himself but stated his legs felt heavy. At 1:50 pm the CNA answered his call light and found he had taken himself to the bathroom. She stated that when he went to get back into the bed it was ""abnormal"" how he was getting into it so she assisted him. At that time he quit breathing and she called a RN into the room immediately. He was found without a pulse, respirations, or blood pressure at 1:54 pm.

VAERS ID: 920815-1, 58yo Found deceased in her home, unknown cause, 6 days after vaccine.

VAERS ID: 920832-1, 104yo Vaccine 12/30/2020 Screening PCR done 12/31/2020 Symptoms 1/1/2021 COVID test result came back positive 1/2/2021 Deceased 1/4/2021

VAERS ID: 921175-1, 77yo Resident received Covid Vaccine, noted after 30 mins with labored breathing BP 161/77, HR 116, R 38, T 101.4, epipen administered, sent to ER, died

VAERS ID: 921481-1, 88yo Vaccine given on 12/29/20 by Pharmacy. On 1/1/21, resident became lethargic and sluggish and developed a rash on forearms. Resident expired on 1/4/2021

VAERS ID: 921547-1, 65yo RESIDENT RECIEVED VACCINE ON 1/2/20. DEATH ON 1/4/2021.

VAERS ID: 921572-1, 87yo Resident had body aches, a low O2 sat and had chills starting on 12/30/20. He had stated that they had slightly improved. On 1/2/21 during the NOC shift his O2 sat dropped again. He later went unresponsive and passed away.

VAERS ID: 921667-1, 39yo LTCF Pfizer Vaccine clinic conducted 12/29/2020 Vaccine lead received a call indicating that a staff member deceased somewhere between 1/3/2021 and 1/4/2021. Cause of death is unknown, and an autopsy is being performed.

VAERS ID: 921880-1, 96yo The resident was found deceased a little less than 12 hours following COVID vaccination.

FDA has had 10 months to get a safety monitoring system in place, but is no where near implementing one.

02/19/21

One-Third of Deaths Reported to CDC After COVID Vaccines Occurred Within 48 Hours of Vaccination

The numbers reflect the latest data available as of Feb. 12 from the CDC's Vaccine Adverse Event Reporting System website. Of the 929 reported deaths, about one-third occurred within 48 hours.

As is consistent with [previous VAERS data reports](#), 192 of the reported deaths — or 21% — were cardiac-related. As [The Defender](#) reported earlier this month, Dr. J. Patrick Whelan, a pediatric rheumatologist, warned the U.S. Food and Drug Administration in December that [mRNA vaccines](#) like those developed by [Pfizer](#) and [Moderna](#) could cause heart attacks and other injuries in ways not assessed in safety trials.

Of the 929 deaths reported since Dec. 14, 2020, the average age of the deceased was 77.8 and the youngest was 23. Fifty-two percent of the reported deaths were among men, 45% were women and 3% are unknown. Fifty-eight percent of the deaths were reported in people who received the Pfizer vaccine, and 41% were related to the Moderna vaccine.

States with the [highest reported number](#) of deaths were: California (71); Florida (50); Ohio (38); New York (31); Kentucky (41); Michigan (31); and Texas (31).

According to the latest data, 3,126 “serious” [adverse reactions](#) have been reported. Adverse reaction reports from the latest CDC data also include:

- 34 [miscarriages and pre-term births](#)
- 917 [anaphylactic reactions](#), 70% of which were reported after a [Pfizer](#) vaccine and 30% after the [Moderna](#) vaccine
- [Bell's palsy](#) (Pfizer 75%; Moderna: 25%)

So far, only Pfizer and Moderna vaccines — approved for [emergency use](#), but not fully licensed — are being used in the U.S.

Meanwhile, the FDA has not yet implemented systems to monitor the safety of the [experimental](#) COVID vaccines. FDA officials [told The New York Times](#) they don't expect the systems to be up and running before the Biden administration reaches its goal of vaccinating 100 million Americans — nearly one third of the U.S. population.

The U.K. has their own tracking system (Yellow Cards)

BREAKING: UK gov't says over 240 people in Britain died shortly after receiving COVID jab

The report included in its ancillary material the information that a total of 8 miscarriages have been reported

LONDON, England, February 11, 2021 (LifeSiteNews) — A U.K. government vaccine safety review has revealed that 244 people, including 8 unborn babies, have died in Britain shortly after receiving one of two coronavirus vaccines. The government has said that it does not believe the inoculations are responsible.

An extensive report produced by the U.K. government today has detailed all the suspected side effects, including death, reported by medical staff or the people who received at least one Covid-19 vaccine between early December 2020 and January 31, 2021. The two vaccines currently in use in the U.K. are the Pfizer/BioNTech and the Oxford University/AstraZeneca. They were authorized by the country's Medicines and Healthcare products Regulatory Agency (MHRA).

The MHRA monitors the safety of the vaccines as they are used on the public, and to this end they introduced a "Yellow Card Scheme" to collect reports of any suspected side effects. 20,319 Yellow Card reports, including a total of 59,614 suspected adverse reactions, were made regarding the Pfizer vaccine. 11,748 were made regarding the AstraZeneca vaccine, which was rolled out only on January 4, 2021. 72 Yellow Card reports did not specify which vaccine was used.

[According to the report:](#)

The MHRA has received 143 UK reports of suspected ADRs to the Pfizer/BioNTech vaccine in which the patient died shortly after vaccination, 90 reports for the Oxford University/AstraZeneca vaccine and 3 where the brand of vaccine was unspecified.

The report included in its ancillary material the information that 5 miscarriages were reported after the use of the Pfizer vaccine and 3 after the Oxford vaccine.

Suspected adverse reactions after receiving Pfizer/BioNTech vaccine

A total of **59,614 suspected side effects** were recorded after use of the Pfizer/BioNTech vaccine.

[The link to the Pfizer vaccine analysis](#) shows clearly that **1,437 blood disorders** have been reported after inoculation, 1,204 of them being lymphadenopathy (enlarged or swollen lymph nodes). **712 cardiac disorders** were reported, notably palpitations (303) and a speeding heart rate (230). **445 ear disorders** were reported, including vertigo (146), ear pain (122), and varying amounts of hearing loss (31).

However, there have been reports of more serious damage associated with the vaccine, notably anaphylaxis and Bell's Palsy. Now 130 "spontaneous adverse reactions associated with anaphylaxis or anaphylactoid reactions" in Britain have been reported for the Pfizer vaccine, and 30 have been reported for the Oxford vaccine. Bell's Palsy, which involves facial paralysis or weakening of the facial muscles, has been reported 99 times for the Pfizer vaccine and 15 times for the Oxford vaccine. The MHRA says that because this ailment "can also occur naturally, an association with the vaccine is not yet confirmed."

There were **224 injuries** reported, and **357 metabolic disorders**, of which 252 were decreased appetite. **8,129 muscle and tissue disorders** were mentioned, of which 2,690 were muscle pain and 1,704 were joint pain. **11,160 nervous disorders** were reported, including 5,506 headaches, 1,546 cases of dizziness, 45 seizures, 15 cases of paralysis, and 1 case of locked-in syndrome. There were **5 miscarriages** reported.

Of the **830 psychiatric disorders** reported, 162 were insomnia, 112 cases of being in a confused state, and 73 bouts of anxiety. Of the **120 renal & urinary disorders**, 35 were renal pain and 12 were urinary incontinence. There were **187 reproductive and breast disorders** mentioned, of which 31 were breast pain and 22 menorrhagia (heavy periods).

There were **2,397 respiratory disorders** reported, including 520 cases of difficulty in breathing, 483 sore throats, and 426 cases of coughing. **3,947 skin disorders** were reported, including at least 796 rashes and 776 cases of itchiness. The **676 vascular disorders** on record included 182 hot flushes.

There were **823 references to eye disorders**, including 145 reports of eye pain, 126 of blurred vision, and 5 of blindness. **6,605 gastrointestinal disorders** were reported, among them 2,889 cases of nausea, 924 cases of diarrhea, 775 cases of vomiting, and 283 cases of upper abdominal pain. Of the **19,354 "general disorders"** reported, 4,007 were cases of fatigue, 3,665 were fevers, 2,310 were chills, 773 referred to vaccination site pain, 491 were "influenza-like illnesses." There were **308 immune system disorders**, mostly hypersensitivity (146) and anaphylactic reactions (116).

Ironically, there were **1,186 reported infections**, including 308 cases (including "suspected cases") of Covid-19 itself, 231 cases of influenza, and 154 upper respiratory tract infections.

**EudraVigilance - European database of suspected adverse drug reaction reports**

COVID-19 Vaccine Adverse Drug Reactions
3,964 DEAD
162,610 Injuries Through March 13, 2021
