**APPENDIX C, including Flu Vaccine**  
**Effective September 30, 2021**

**ADMINISTRATIVE REQUIRMENTS**

- **Immunizations:** The Flu vaccine has been shown to reduce flu illness, hospitalization, and death which is especially important in our shared patient population. CHLA's specialty clinics serve as the "medical home" for chronically ill or medically complex patients who will typically see our pediatric specialists more frequently than they visit their assigned primary care physician. To increase immunization rates and remove any administrative barriers to (PLAN) patients receiving the flu vaccine under the care of CHLA's Allergy/Immunology, Cardiology, Endocrinology, Gastroenterology, Hematology/Oncology and Pulmonology clinics:
  - (PLAN) will waive any requirements that patients receive the flu vaccine from their primary care physician
  - (PLAN) will waive any prior authorization requirements for the flu vaccine
  - (PLAN) will reimburse CHLA [REDACTED] for each flu vaccine administered
