# COVID Metrics: Cases and Hospitalizations

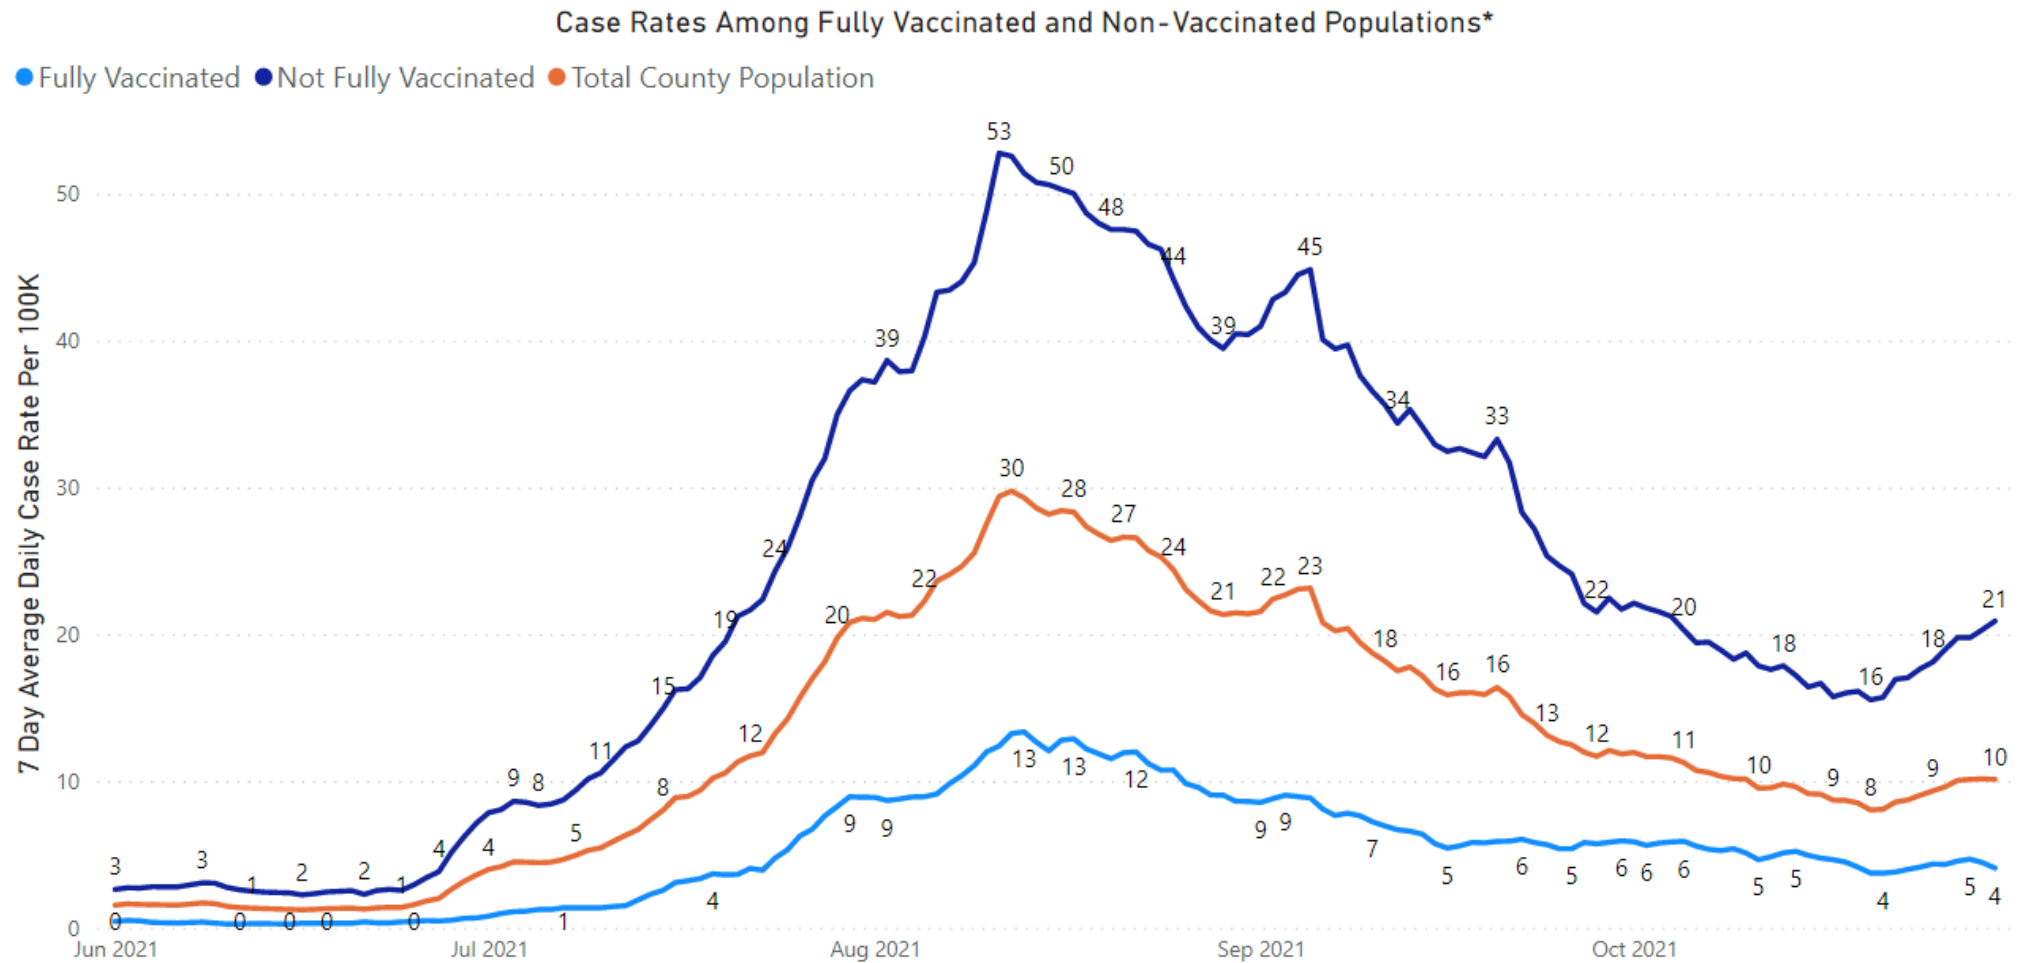

Graph 1: Ventura County Daily New COVID Cases by Lab Collection Date - 7 Day Delay

Graph 2: COVID-19 in Ventura County Hospitals

# COVID Metrics: Case Rate by Vaccination Status

\* To ensure equal comparison all case rates are calculated through the date of the most recent fully vaccinated case.

\* Case rates will update weekly alongside fully vaccinated case counts. Smaller changes in rate may occur more often as historical records are re-allocated or updated.

# Public Health Officer Update

## COVID Vaccine for Children

- **Final approval 6 days ago by Western States Scientific Review Workgroup**
- **Vaccination of children 5 to 11 years of age in full swing**
- **Pediatrician vaccinated 170 to 200 children last Thursday and Friday**
- **No anticipated vaccine shortages**
- **Reactions mild, self-limited, less than older children and adults**
- **Efficacy 90.7% against symptomatic disease**

# Public Health Officer Update

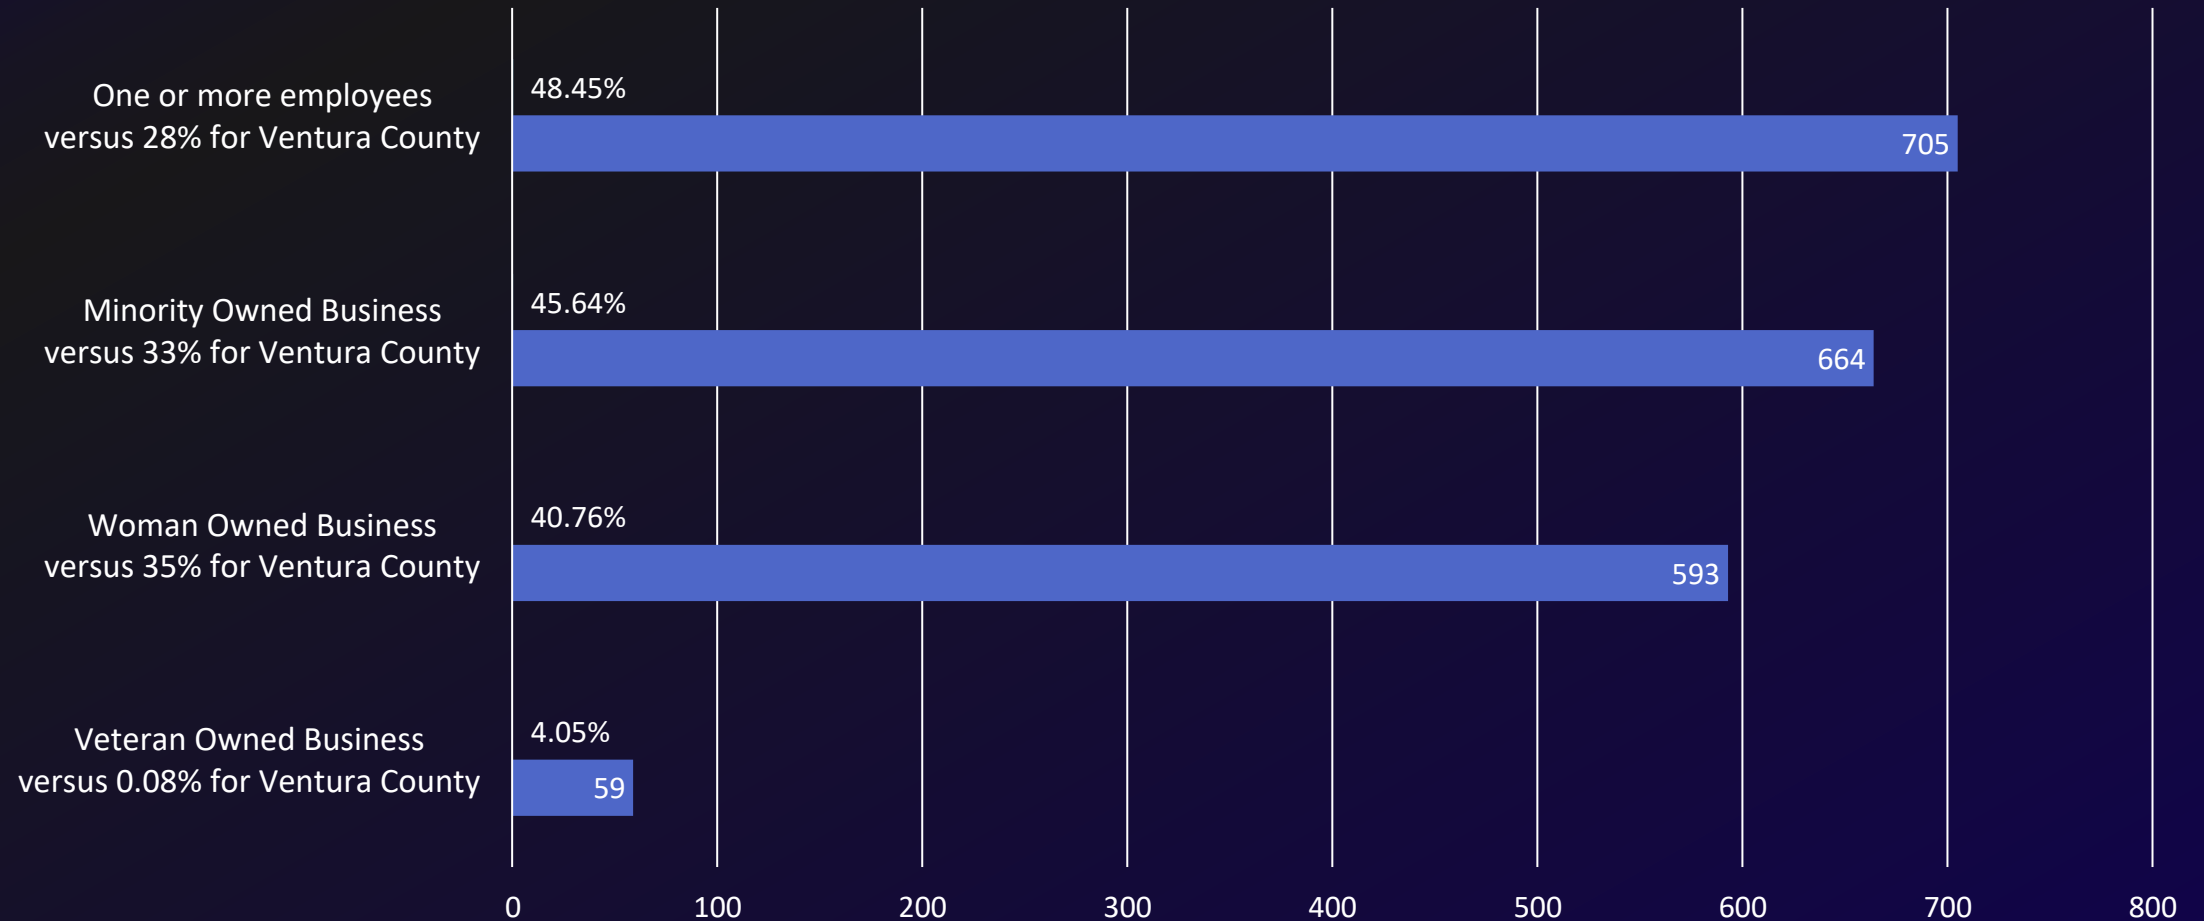

## Why Vaccinate Children 5 to 11 Years of Age?

- To protect them: 9,000 hospitalizations and 680 deaths
- Ten percent will get long COVID
- Transmit to others
- Can visit grandparents
- Miss less school and see fewer school closures
- May play sports
- May travel with parents
- Reduce size of susceptible population which:
  - decreases opportunity for new variants
  - decreases chances of surges that close schools and businesses

# Business Assistance Programs Update

Fourth Program (1455 Total Submitted) - Priority Factors

Working Together, We Can Help Our Communities Move Forward
