WARNING: If you believe this message may be malicious use the Phish Alert Button to report it or forward the message to Email.Security@ventura.org.

Dear Ventura County Planning Commission

I support the proposed amendments to the Non-Coastal Zoning Ordinance and Coastal Zoning Ordinance related to oil and gas operations in Ventura County. I urge you to make these amendments even stronger, however, by doing the following:

1. Limiting permit expiration to 10 years.
2. Limit the number of wells on individual permits and adopt a "one-for-one" policy.
3. Increase the surety cap beyond \$5 million to ensure that wells are properly abandoned.

As climate change worsens, it is a critical time for the County to adopt strong policies for ensuring that oil and gas companies pay their fair share.

Please protect our communities, air, water, endangered species, and the climate by incorporating the above suggestions into your resolution.

Thank you for your consideration,
Grace Malloy

Good morning, Commissioners,

I am **urging you to vote no** on the increased bonding requirements.

We don't require more bureaucracy!

The people just spoke, "Leave Oil alone" Use our local resources, not shipped in from overseas! **Vote the way the votes requested last election.**

Increasing bonding requirements for oil and gas operators, in addition to what is required by the state, is unnecessary and will create an additional layer of bureaucracy.

In many cases, the bonds are unavailable. The County recently shared its own experience with the insurance market when it approved a County budget 5.8% larger than last year citing insurance costs. The price of liability insurance grew from \$14 million to \$31 million. The VC Star stated this is, "a trend likely to continue over the next few years, and managers tied the surge to volatility in the insurance market, shrinking numbers of insurers..." Bonds serve as insurance only if a company shuts down.

A healthy energy industry will ensure that resources are available to manage all assets. The bond requirements identified in the staff report would increase 1,000% from existing requirements. This is burdensome and unnecessary. Please vote No.

Dear Ventura County Planning Commission

I support the proposed amendments to the Non-Coastal Zoning Ordinance and Coastal Zoning Ordinance related to oil and gas operations in Ventura County. I urge you to make these amendments even stronger, however, by doing the following:

1. Limiting permit expiration to 10 years.
2. Limit the number of wells on individual permits and adopt a "one-for-one" policy.
3. Increase the surety cap beyond \$5 million to ensure that wells are properly abandoned.

As climate change worsens, it is a critical time for the County to adopt strong policies for ensuring that oil and gas companies pay their fair share.

Please protect our communities, air, water, endangered species, and the climate by incorporating the above suggestions into your resolution.

Thank you for your consideration,
Samantha Green
