

January 31, 2023

Dear Dr. Johnson,

Coincident with the State's planned lifting of its Public Health Order at the end of next month and based on the decreased numbers of COVID admissions to the hospitals and COVID-related deaths in our county, I have determined that the imminent and proximate threat to the public's health has diminished sufficiently that it is reasonable to lift our Declaration of Local Health Emergency as early as February 28, 2023.

Sincerely,

Robert M. Levin, MD  
Ventura County Health Officer
